

ALGAECIDE L

(SWIMMING POOLS)

COMPOSITION

Active ingredient

Poly[oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride].....10.0 percent

Inert ingredient.....90.0 percent

APPLICATION

ALGAECIDE L is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using ALGAECIDE L.

For pools having just visible algae growth add an initial dose of 75 to 115 fluid ounces of ALGAECIDE L per 10,000 gallons of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 41 to 75 fluid ounces of ALGAECIDE L per 10,000 gallons of water.

To maintain pools free of visible algae growth, subsequent additions of 13.5 to 21 fluid ounces of ALGAECIDE L per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of ALGAECIDE L throughout the water in the pool is necessary for maximum effectiveness.

ALGAECIDE L is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. ALGAECIDE L can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGAECIDE L with concentrated dry or liquid chlorine products.

CAUTION

KEEP OUT OF THE REACH OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact with eyes, flush with water for at least 15 minutes. If eye irritation persists get medical attention.

Rinse empty container thoroughly with water and discard container. Do not reuse container. Do not pierce it by perforating or crushing. Bury or discard in a safe place away from water to fish. Treated effluent should not be discharged where it will drain into water. Apply this product only as specified on this label.
