EPA Est. No. 34797-1A-02

(See side panel for use directions and additional precautionary statements)

If your drain is completely blocked call your local Roto-Rooter Sewer and Drain Service listed in the white pages of your phone directory.

**Directions For Use**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**To open:** Press down in groove — pry and lift lid off. To close: Place lid on container — press edges down. Shipping lid on.

**Residential or Household Sewer Systems:** In household sewer use 2 pounds of Roto-Rooter™ Root Destroyer twice yearly. Add Root Destroyer to sewer line by pouring about 1/2 pound into the lower bowl nearest to the sewer line and flush. Repeating process until recommended dose has been added. Or remove cleanout plug and pour entire recommended quantity directly into the sewer line. Reinsert plug and flush toilet several times. Note: Do not apply Root Destroyer through sink or tub drains as it will corrode these metal drains.

If system is equipped with a septic tank, Root Destroyer will be precipitated in the septic tank and will not pass into the absorption drain field. To treat drain field pipes, add 2 pounds of Root Destroyer to distribution box located between the septic tank and the drain field. If distribution does not have an opening, it would be advisable to install a cleanout plug opening into the outlet pipe from the septic tank leading to the drain field for effective root control in the drain field pipes.

**Storage & Disposal**

**Product Disposal:** Securely in original container in several layers of newspaper and discard in trash.

**Container Disposal:** Do not reuse container. Rinse thoroughly before discarding in trash.

**Storage:** Store in a dry place. No water. Temperature: 50°F or higher than 120°F.
