Attention: Said I. Rasiq
Director of Research

Gentlemen:

Subject: Labeling
Thymo-Cide
EPA Registration No. 34810-18
Your Amendment Application Dated November 10, 1987

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that the following revisions are made before the product is released for shipment bearing the amended labeling.

1. In the statement "For all disinfection of hard surfaces in hospitals . . . water," change "at 1/2 ounce per gallon of water" to read "at 1 ounce per gallon of water."
2. Delete the statement "For Use and Storage by Maintenance Personnel Only." This is no longer allowed. You must assure yourself that this product is in compliance with the Child Resistant Packaging Regulations (Final Rule) Part 157, Subpart B of Title 40 of the Code of Federal Regulations.
3. We recommend that you delete "of milk" in the ingestion statement.
4. The child hazard warning (i.e., Keep Out of Reach of Children) should be placed immediately above the signal word CAUTION on the front panel.
5. We have amended our records to reflect the additional container size for this product. We have no objection to the proposed modification to the disposal statement for the additional size container.

thymo-cide

CONCENTRATED GERMICIDAL DETERGENT

THYMO-CIDE is used for cleaning, disinfecting and deodorizing floors, walls and other hard surfaces. Especially suited for use in Operating Rooms, Intensive Care, Nurseries, Emergency Areas, Patient Rooms and Rest Rooms. When used as directed THYMO-CIDE is effective against gram negative and gram positive microorganisms such as Staphylococcus aureus, Salmonella choleraesuis, Pseudomonas aeruginosa. Pathogenic fungi, Mycobacterium tuberculosis and lipophilic viruses such as Influenza A (H3N2-Hong Kong), Herpes Simplex Type 2, and Vaccinia in the presence of A.O.C. 400 ppm hard water and 5% serum.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For all disinfection of hard surfaces in hospitals, health care facilities, schools and nursing homes, such as floors, walls, bath room fixtures, shower stalls, use THYMO-CIDE at 1/2 ounce per gallon of water. THYMO-CIDE use-dilution may be applied with a stiff scrub brush on surfaces such as stainless steel, chrome, glass, vinyl, ceramic and terrazzo. Weal, non-porous environmental surfaces with moderate organic soil load thoroughly for 10-15 minutes. Use-dilution of THYMO-CIDE should be obtained by the supplier if facilities are dechlorinated.

THYMO-CIDE is effective against Influenza A (Hong Kong), Herpes Simplex Type 2, and Vaccinia viruses in 400 ppm hard water and 5% serum. For non-porous hard surfaces, THYMO-CIDE is a 1000 ppm disinfectant with broad spectrum activity against gram positive and gram negative microorganisms.

Contains biodegradable materials and is phosphate free. DO NOT MIX WITH OTHER CLEANERS. For gross film or heavy soil a pre-cleaning step is required.

CAUTION

KEEP OUT OF REACH OF CHILDREN. Corrosive, causes eye damage and skin irritation. Avoid breathing spray mist. Do not get in eyes, on skin or on clothing. Wear rubber gloves and safety glasses when handling concentrate. Harmful if swallowed. Avoid contamination of food.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty containers. Triple rinse (or equivalent), then offer for recycling or reconditioning or dispose of in a sanitary landfill or by incineration, if allowed by state and local authorities. Consult federal, state or local disposal authorities for approved alternative procedure.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, e.g. whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid vomiting and call a physician.

NOTE TO PHYSICIAN

Extensive mucosa damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.
