TOPPS CONCENTRATED GERMICIDAL DETERGENT

TOPPS is used for one-step cleaning, disinfecting and deodorizing floors, walls, and other hard surfaces. Especially suited for use in Operating Rooms, Intensive Care, Nurseries, Emergency Areas, Patient Rooms and Rest Rooms. TOPPS is a synthetic germicidal detergent with broad spectrum kill of both gram positive and gram negative microorganisms. It is an excellent cleaner, and contains biodegradable detergent. DO NOT MIX WITH OTHER CLEANERS.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For all disinfection of hard, nonporous, surfaces in hospitals, health care facilities, schools, and nursing homes, such as floors, walls, bathroom fixtures, shower stalls, and surgical instruments, use TOPPS at 1/2 ounce per gallon of water. TOPPS use-dilution may be applied with a cloth, mop or brush on surfaces such as stainless steel, chrome, glass, vinyl, ceramic, and terrazzo. Wet all surfaces thoroughly for at least 10 minutes. **Gross filth and heavy soil must be removed before applying cleaning solution. When used for mopping or from an open pail, solution should be changed at least daily or more often if the solution becomes diluted or soiled.

DISINFECTING SURGICAL INSTRUMENTS: These instruments must be thoroughly pre-cleaned to remove blood and serous exudates, rinsed and rough dried prior to immersion in, or treatment; clean and rinse the lumens of hollow instruments before filling with solution.

*TOPPS KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATING SURFACES OR OBJECTS SOILED WITH BLOOD AND BODY FLUIDS WHICH MAY CONTAIN HIV-1 (AIDS VIRUS). PERSONAL PROTECTION; Wear disposable rubber or latex gloves, gowns, face masks, or eye coverings as appropriate, when performing manual cleaning of these surfaces. **CONTACT TIME:** Leave surfaces wet for 1 minute. This contact time will not control other common types of viruses and bacteria.

CLEANING PROCEDURE: TOPPS solution may be used to remove and clean blood and other body fluids from surfaces and objects before disinfection. For lightly soiled areas wipe off visual soil/clean with TOPPS solution, and disinfect surface with a second application of the TOPPS solution. For large spills the contaminated area should be flooded with the TOPPS solution before cleaning, then decontaminated with fresh TOPPS solution.

DISPOSAL OF INFECTIOUS MATERIAL: Blood and other body fluids should be autoclaved and disposed of according to Federal, State and local regulations for infectious waste disposal.
