# DRI-CIDE 256

## DRY GERMICIDAL DETERGENT

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

### DIRECTIONS FOR USE

**DISINFECTION:** For disinfection of non-porous hard surfaces such as floors, walls, bathroom fixtures, shower stalls, stainless steel, chrome, glass, vinyl, vinyl asbestos, glazed ceramic and terrazzo, use 1/2 ounce (1 heaping blue scoop) to 1 gallon of warm water. Stir gently for a uniform solution. Solution may be applied with mop, cloth, scrubber or other suitable applicator, or by immersion. Wet surfaces thoroughly for at least ten minutes before drying. For heavily soiled areas, a pre-cleaning step is required. When used for mopping or from an open pail, solution should be changed at least daily or more often if the solution becomes diluted or soiled. DRI-CIDE 256 is a synthetic germicidal detergent with broad spectrum kill of many gram positive and gram negative microorganisms. It contains biodegradable detergents and is phosphate free. **DO NOT MIX WITH OTHER CLEANERS.**

**DECONTAMINATION OF CRITICAL OR SEMI-CRITICAL DEVICES PRIOR TO TERMINAL STERILIZATION/HIGH LEVEL DISINFECTION:** This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

**\*DRI-CIDE 256 KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus type 1 (HIV-1) (associated with AIDS).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATING SURFACES/OBJECTS SOILED WITH BLOOD AND BODY FLUIDS WHICH MAY CONTAIN HIV-1 (AIDS virus). PERSONAL PROTECTION:** Wear disposable rubber or latex gloves, gowns, face masks, or eye coverings as appropriate, when performing manual cleaning of these surfaces. **CONTACT TIME:** Leave surfaces wet for 1 minute. This contact time will not control other common types of viruses and bacteria. **CLEANING PROCEDURE:** DRI-CIDE 256 solution may be used to remove and clean blood and other body fluids from surfaces and objects before disinfection. For lightly soiled areas wipe off visual soil/clean with DRI-CIDE 256 solution, and disinfect surfaces with a second application of the DRI-CIDE 256 solution. For large spills the contaminated area should be flooded with the DRI-CIDE 256 solution before cleaning, then decontaminated with fresh DRI-CIDE 256 solution. **DISPOSAL OF INFECTIOUS MATERIAL:** Blood and other body fluids should be autoclaved and disposed of according to Federal, State and local regulations for infectious waste disposal.

DRI-CIDE 256 is a one-step cleaner-disinfectant, used for cleaning, disinfecting and deodorizing. When used as directed on non-porous, inanimate surfaces it is effective against the following organisms.

#### GERMICIDAL QUALIFICATIONS:

(AOAC Use Dilution Confirmation) in the presence of 400 ppm hardness and 5% serum at ..... 1:256

(AOAC Pseudomonas aeruginosa, Salmonella choleraesuis and Staphylococcus aureus)

#### TUBERCULOCIDAL ACTIVITY TEST:

(AOAC M Tuberculosis) in the presence of 400 ppm hardness and 5% serum (20° C for 10 minutes) at ..... 1:256

#### FUNGICIDAL TEST:

(AOAC T. Mentagrophytes) in the presence of 400 ppm hardness and 5% blood serum at ..... 1:256

#### \*VIRUCIDAL ACTIVITY TEST:

(Influenza A2, (Hong Kong) in the presence of 400 ppm hardness and 5% blood serum, and HIV-1(AIDS virus) in the presence of 400 ppm hardness and 10% serum at ..... 1:256

**AREAS OF USE:** Hospitals and nursing homes, veterinary and animal care facilities, industrial plants, office buildings, schools and recreational areas.
