DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ROACH BUSTER will not lose its potency and will give long continuous insect control when applied as directed. The powder clings to the insect's legs and body. It kills them by contact and when it is eaten. If the powder placement becomes damp replace with dry powder to give continued protection. Do not apply this product to marble stone surfaces.

HOW TO APPLY: Remove the cover cap and cut off 1/4 inch of the applicator tip. Point the tip and squeeze the bottle to dispense the powder into cracks and crevices.

FOR RESIDENTIAL USES: (Homes, Apartments, Condominiums, Hotels, Hospitals, Motels, Schools, Mobile Homes) Apply powder liberally under and behind stoves, dryers, refrigerators, dishwashers, washing machines, and other appliances that may harbor Roaches, Ants, or Silverfish. Treat along baseboards, and cracks and crevices where roaches and ants may hide.

Remove all lower cabinet drawers in the bath and kitchen areas. Puff the powder into drawer wells and sprinkle into each corner of shelves and shelving. Any powder that is visible after application must be brushed into cracks and crevices or removed. Repeat as needed for control.

For Attic, Lofts, and other seldom used storage areas use for control of Roaches, Ants, Spiders and Silverfish. In newly constructed areas where insects may hide and breed apply this product between joists before the insulation or flooring is in place. Use at the rate of about 8 ounces of powder per 250 square feet. Apply lightly over the insulation after it is in place and before the flooring is down. If the insulation is already in place dust the powder down along the sides of the joists and over the batting. This treatment will give long lasting insect control.

Reapply the product as necessary for control. Any powder visible after application must be brushed into cracks and crevices or removed. Apply only in area inaccessible to children and pets.

FOR COMMERCIAL AND INDUSTRIAL BUILDINGS - (Old and new structures). Apply with "Squeeze Bottle" to within walls, soffits, subcabinet voids, and behind long banks of appliances, cabinets or lockers. Apply to pits under dumb waiters and under booth seats. In storerooms apply under pallets and boxes and around baseboards and pipes. Also to non-food areas including garbage rooms, lavatories, floor drains (to sewer entries) offices, garages and mop closets.

FOOD HANDLING ESTABLISHMENTS- For use in places other than private residences in which exposed food is held, processed, prepared or served. **FOOD AREAS:** THIS APPLICATION IS LIMITED TO CRACK AND CREVICE TREATMENT ONLY. This includes areas of receiving, storage, packing, (canning, bottling, wrapping, boxing), preparing, edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups), serving areas (when food is exposed and facility is in operation would also be considered a food area).

For these areas apply directly into cracks and crevices using the "Squeeze Bottle". Apply in all points between different elements of construction, between equipment and floor, openings leading to voids and hollow spaces in walls, equipment legs and bases, to control roach infestations. Care should be taken to avoid depositing the powder on exposed surfaces or introducing powder into the air. Avoid contamination of food or food processing surfaces.

DIRECTIONS FOR USE (Cont.)

Do not use in edible product areas of food handling establishments, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Avoid contamination of food and foodstuffs.

PRECAUTIONARY STATEMENTS

Hazards To Humans and Domestic Animals

CAUTION: Harmful if swallowed. May cause eye irritation. Avoid eye contact. Wash hands thoroughly after handling and before eating or smoking. Apply only in areas inaccessible to children and pets. Do not contaminate feed or foodstuff.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Store product in original container in a cool, dry, locked place out of reach of children. Do not re-use empty container. Wrap and put in trash.

NOTICE: Buyer assumes all risk and liability of use, storage and/or handling of this material not in accordance with the terms of this label.
