

2. Peel on the tape bag and very gently remove one strip at a time and place powdered side face up.
3. DO NOT shake excess powder off the tape.
4. After the tape has been placed, pour the small amount of remaining powder behind the stove or in the cabinet or under the sink to a bait rodent breeding area.

TREATING THE CLOSET:

Place 1 or 2 strips in the trunk along the edges and in crevices where the tape will not be disturbed. Place 4 strips in both the coat closet, under seat, and 2 in the glove compartment.

TREATING THE KITCHEN:

Place 1 or 2 strips in each drawer, cabinet, behind refrigerator, washer/drier, under the sink and near all cracks and crevices. Use 1 strip in each heavy, use 2 to 3 strips on more.

TREATING THE BATHROOM:

Place 3 or 4 strips in all cabinets, drawers, on top of any flat moldings, ledges; 2 strips on either side of the toilet bowl where anchored to the floor; near or in all cracks.

DO NOT remove the tape once roaches have disappeared as it continues to protect. Replace tapes when control diminishes.

CAUTION: This product is intended for homeowner use only.

KILLER reg. TM
TAPE

ACTIVE INGREDIENT:

BORIC ACID 99%

INERT INGREDIENT:

TRICALCIUM PHOSPHATE 1%

100%

CAUTION:
 KEEP OUT OF REACH OF CHILDREN

NET WT. OF POWDERS 1 OZ. 75 strips of Tape

CAUTION: When using boric acid, follow the usual precautions for insecticide use. Like other inorganic compounds, boric acid does not irritate the skin to a high degree but gloves should be worn during contact with the powder.

Special care should be taken to prevent inhalation of powder during application. DO NOT apply to areas where children or pets could be exposed to powder. Keep the powder in the original container and do not use if the container is damaged. DO NOT apply to plants, lawns, or ornamentals.

The 75 pieces (25 ft) of powder is a minimum amount for a single application. It is not enough to protect a studio apartment or a single room that is larger than the average home.

For best results, use the powder in a dry area which is not too large to be reached by the roaches. If the powder is applied to a wet surface, the powder will be washed away and will not be effective. If the powder is applied to a wet surface, it is a clean up problem to them and they will not be able to reach it.
