CEMCO 956

ACCEPTED
with COMMENTS
in EPA Letter Dated:

SEP 05 1985

ACTIVE INGREDIENT:

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

2-(Thiocyanomethylthio)benzothiazole ... 30%

INERT INGREDIENTS 70%

KEEP OUT OF REACH OF CHILDREN
DANGER

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Causes irreversible eye damage. Causes skin irritation. This product may cause allergic skin reactions. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

STATEMENT OF PRACTICAL TREATMENT: If in eyes, flush with plenty of water. Get medical attention. If on skin, wash with plenty of soap and water. Get medical attention. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not apply in marine and/or estuarine oil fields. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Do not use or store near heat or open flame.

Manufactured by:

Cemco Water Conditioning Inc.

P.O. Box 11462

Portland, OR 97211

EPA REG. NO.

EPA EST. NO.

NET CONTENTS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with the labeling.

COOLING TOWERS: CEMCO 956
cooling tower wood against soft or surface rot and internal rot by cleaning or painting a dispersion containing 0.5 to 0.7% CEMCO 956 in water onto the clean wood surfaces. The amount applied is _____ per 1000 ft.² of wood.

rot can also be inhibited by periodic shock doses of CEMCO 956 to the recirculating cooling water at the tower basin or cold water bleedoff should be stopped for 4 to 6 hr. after treatment. Subsequent bleedoff should be stopped for 4 to 6 hr. after treatment. Repeat every four months.

COOLING WATER: CEMCO 956
bacteria, and fungi in industrial recirculating cooling water systems. When cleaning or maintenance has begun, the system should be cleaned thoroughly to remove biological slime, and other deposits. System should then be disinfected with an initial dose of 0.6 to 3.7 fl. oz. of CEMCO 956 per 1000 gal. water in the system. Subsequent dosing should be made every 1 to 5 days, depending on the severity of microbiological fouling.

DRILLING FLUIDS: To inhibit bacterial and fungal degradation of drilling fluids, CEMCO 956 is incorporated into the drilling fluid at concentrations of 0.05 to 0.25% based on the total wet weight of the drilling fluid.

PETROLEUM SECONDARY RECOVERY: CEMCO 956
control sulfate-reducing bacteria, slime-forming bacteria and fungi in micellar floods, water disposal systems, and other oil-field water systems. Add CEMCO 956 at a rate of _____ per 1000 gal of water.

be made continuously or intermittently by means of a metering pump before or after injection pumps and injection well headers. Continue dosing until the system is noticeably fouled, add 0.6 to 3.7 fl oz CEMCO 956 per 1000 gal of water.

water continuously until desired degree of control is achieved. 1 to 2 fl oz CEMCO 956 per 1000 gal of water will maintain control. Intermittent or Shock Method: When system is noticeably fouled, add 0.6 to 3.7 fl oz CEMCO 956 per 1000 gal of water to 8 hr per day and 1 to 4 times per week, or as needed to maintain control.

CUTTING FLUIDS: CEMCO 956
fungal degradation of water-based and water-soluble or emulsifiable cutting fluids in metalworking operations. It should be added to the cutting fluid at a rate of _____ parts per million CEMCO 956 with water.

added to the concentrate before dilution at a rate of 125 to 1250 ppm depending on the required concentration in the diluted fluid.

STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not expose to extreme temperatures. Do not store in high. Drums should be opened in well ventilated areas. Leaking or damaged drums should be opened in well ventilated areas. Leaking or damaged drums should be opened in well ventilated areas. Leaking or damaged drums should be opened in well ventilated areas. Spills should be absorbed in sawdust or other suitable material and disposed in a sanitary landfill.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Do not reuse or discharge. If a pesticide, spray mixture, or rinseate is a violation of Federal Law. If it is a violation of Federal Law, use according to label instructions, contact your State Pesticide Control Agency or the Hazardous Waste representative at your EPA Regional Office.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reuse, if authorized, or puncture and dispose of in a sanitary landfill, or by other procedures as required.
