**PESTS OUT OF DOORS**

DO NOT ALLOW THE SPRAY TO CONTACT PLANTS, LAWNS, FLOWERING PLANTS, SHRUBS, TREES, ETC. BECAUSE OF POSSIBLE INJURY.

**TO CONTROL FIRE ANTS:** Dilute 5 pints (0.71 L) of this product in 1 gallon (3.79 L) of water. Apply 1 gallon (3.79 L) of solution as a gentle rain to each fire ant mound using a sprinker can. Thoroughly wet the mound and surrounding area to a 4 foot diameter (1.22 m). For best results, apply in cool weather: 65-80°F (18-27°C) or in early morning or late evening hours. Treat new mounds as they appear. Do not disturb the mound prior to treatment. If possible, treat all mounds in the vicinity and treat all colonies which may not as yet have constructed a mound.

Larger quantities of solution can be prepared for multiple mound treatments. Equipment to deliver the diluted product as a gentle rain at the rate of 1 gallon (3.79 L) per mound is still required. Do not use equipment that generates a pressurized spray as pressurized sprays may disturb fire ants and cause migration, reducing product effectiveness.

Do not apply when weather conditions favor drift from areas being treated. Do not contaminate water by cleaning of equipment or disposal of wastes.
