

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Bishop Chemical, Inc.
Route 12, Box 12020
Tyler, TX 75706

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product or shipment:

- a. Add the phrase "EPA Registration No. 34874-31."
- b. In your next label printing please include the statement "This Product Treats 30 Linear Feet" instead of "60 Linear Feet."
- c. Please print legible labels.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the 4-79 enclosure for a further description of final printed labeling.

TERMI-CHLOR TERMITE CONCENTRATE

THIS PRODUCT TREATS 60 LINEAR FEET

ACTIVE INGREDIENTS:

Chlorpyrifos (0,0-diethyl 0-(3,5,6-trichloro-2-pyridyl) phosphorothioate).....12.6%
 INERT INGREDIENTS.....87.4%
 Contains 1 pound chlorpyrifos per gallon.
 Contains petroleum distillates.
 Dursban is registered trademark of Dow Chemical.

ACCEPTED
 with COMMENTS TOTAL 100.0%
 In HPA Letter Dated:

JUN 29 1987

Under the Federal Insecticide,
 Fungicide, and Rodenticide Act
 as amended, the pesticide
 registered under EPA Reg. No.

34874-31

WARNING: KEEP OUT OF REACH OF CHILDREN

See Side Panel for Additional Precautionary Statements

STATEMENT OF PRACTICAL TREATMENT

It is intended that this product be used in a manner inconsistent with its labeling. In case of contact, remove contaminated clothing and immediately wash skin with plenty of soap and water. Wash eyes with plenty of water for at least 15 minutes. Call a physician. Note to Physician: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is an antidote.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SUBTERRANEAN TERMITES - DIRECTIONS FOR HOMEOWNER USE

TERMITE CONTROL IN EXISTING STRUCTURES - Buildings with Basements or Crawl Spaces

Preparation of wood forms and wood forms around pipe, space chimney bases and along foundations of poured concrete dig a trench 8 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar and a rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes deeper in hard packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion or solution in the trench at a rate of 6 gallons per 10 linear feet per foot of depth. Apply half of this to the back fill. Termi-Chlor Termite Concentrate should be applied as a 1% water emulsion. Mix 1 gallon of concentrate in 24 gallons of water to produce a 1% emulsion. Sprayed first along the inside of foundations of a two space building. Cover treated soil with a thin layer of untreated soil.

For raised porches, terraces and entrance steps, drill holes at one foot intervals 8 inches from the foundation and pour one half gallon of emulsion or solution into each hole. Refill holes. Steps with heat ducts or radiating foot pipes should be treated by comment or pest control operator.

The object is to create an impervious soil barrier which will prevent termites entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab type construction. It is suggested that you contact the Agricultural Conservation & Pesticide Service for advice or consult a Commercial Pest Control Service. Avoid contamination of food and potable water supplies by following these precautions. Do not allow a hose or any type of faucet attachment to reach into the termite chemical solution while filling or mixing the material with water. Use anti-back flow or anti-siphonage equipment on all drinking equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-back flow equipment will help to insure that the use of this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration), State and local specifications for safe distances of treatment areas from wells. But in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation treat as follows: Do Not Apply Under Pressure. Soil should be removed to an area safe from over or domestic water contamination. Treated, allowed to stand unexposed for ten to four hours then return to the trench which has been lined with a wet plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

RETREATMENT RESTRICTIONS

1. Retreatment for subterranean termites should only be made when there is evidence of reinfestation subsequent to the initial treatment or there has been a deterioration of the chemical barrier in the soil due to construction, excavation, landscaping, etc.
2. Retreatment may be made to critical areas in accordance with the application techniques described above. This application should be made as a spot treatment to these areas. Annual retreatment of the entire premises must be avoided.

**PRECAUTIONARY STATEMENTS
 HAZARDS TO HUMANS**

CAUSES EYE IRRITATION - HARMFUL IF SWALLOWED Do not take internally. Do not get in eyes, on skin or clothing. Wash thoroughly after handling. Wash contaminated clothing before reuse. Avoid breathing vapors and spray mist. Avoid spraying food crops. Keep away from food, feedstuffs and domestic water supplies. Keep containers closed. Handle concentrate in a well-ventilated area.

ENVIRONMENTAL HAZARDS

Termi-Chlor Termite Concentrate is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

PRECAUTION AT WELLS: Be sure no termites, English do not use this product unless label has been fully explained to you.

TRANSLATION TO THE USER: If you cannot read English, do not use this product unless label has been fully explained to you.

PHYSICAL OR CHEMICAL HAZARDS

COMBUSTIBLE: Do not use or store near heat or open flame. Do not cut or pierce container.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store in original container only and in locked storage area. Store in a dry, inaccessible place to children. Do not reuse container. Rinse the thoroughly and store securely in several layers of newspaper and discard in trash.

AGRICULTURAL CHEMICAL

Do not spray or store with food, feed, drugs or clothing.
