INDOOR APPLICATION

The use of this product in food processing establishments should be confined to those periods when the plant is not in operation. Food should be removed or covered during treatment or thoroughly cleaned before using.

vacate treated area and ventilate before reoccupying.

For maximum effectiveness, a combination of spot surface treatment and fogging is recommended.

SURFACE SPRAYING: To control roaches, ants, silverfish, spiders, crickets, clover mites, cheese mites, granary weevils, rice weevils, confused flour beetles, rust red flour beetles, sawtoothed grain beetles, spider beetles, cigarette beetles, Drugstore beetles, meal worms, grain mites, and cadellids: Use a good sprayer adjusted to deliver a coarse wet spray. Direct the spray into hiding places, cracks and crevices, under pallets, around containers of stored loads, around the base of machinery, behind shelves and drawers. For silverfish, spray bookcases, for ants, spray trails, nests and points of entry. If surface application only is to be used, spray floors, walls, and other surfaces applying at a rate of 1 gallon to 750 square feet of surface.

To control carpet beetles: Spray edges of carpeting and under carpet and rugs. Make localized application to floor and baseboards. Spray directly into cracks, closets and infested areas of shelving. Repeat treatment as needed.

To control bedbugs: Spray mattresses lightly, particularly tufts and seams. Take beds apart and spray in all joints. Repeat as needed.

To control fleas and brown dog ticks: Thoroughly spray infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames, and localized areas of floor and floor covering. Fresh bedding should be placed in animal quarters following treatment. Concurrent treatment of animals with an approved insecticide is recommended. Repeat treatment as needed.

To control clothes moths: Remove any infested articles from storage, brush thoroughly and air for several hours in sunlight, if possible. Apply spray liberally to empty chests, closets, bureaus, and other storage, directing spray into cracks, joints, and crevices. After airing, infested articles may be treated lightly keeping nozzle at least three feet from fabric to avoid staining.

SPACE SPRAYING: Close doors and windows and shut off ventilating systems. Apply with a good machine adjusted to deliver a fine mist or fog. For rapid control of flies, fruit flies, gnats, mosquitoes, skipper flies, wasps, hornets, Argentine grain moths, Mediterranean flour moths, Indian meal moths and tobacco moths: direct spray at an upward angle, distributing it uniformly throughout the entire area at a rate of 3-6 ounces per 1000 cubic feet of space.

FOGGING: To kill exposed or accessible stages of the above named crawling insects, use a rate of one gallon to 20,000 to 40,000 cubic feet of space. Contact insects directly whenever possible.

ON ANIMALS: To protect cattle and horses from horn flies, house flies, mosquitoes and gnats, apply a light mist sufficient to wet the surface of the hair. To control stable flies, house flies, and deer flies, apply at a rate of 2 ounces per adult cow or horse sufficient to wet the hair thoroughly. Repeat treatment daily or at intervals necessary to give continued protection.

To control blood-sucking lice, apply to the infested areas of the animal using a stiff brush to get the spray to the base of the hair. Repeat every 2 or 3 weeks if required.

OUTDOOR ADULT MOSQUITO CONTROL: Apply as a fine mist to thoroughly treat entire area. For best results, treat when the wind velocity does not exceed 5 miles per hour. Treat shrubbery or vegetation where mosquitoes may rest few marshy places, stagnant pools or ponds and other areas. Apply at a rate of 1 1/2 gallons per acre (4 1/2 ounces per 1000 square feet). Using truck-mounted conventional misting equipment, such as Rotamist® models 51C, 91 or 100 HT, traveling at 5 m.p.h. to treat a 300 foot swath, calibrate equipment to deliver 4.5 gallons per acre.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS CAUTION

Irritant if swallowed. Avoid contamination of food and feedstuffs.

Remove pets, birds and cover fish aquaria before spraying. This product is toxic to fish. Keep out of ditches, ponds or streams. Do not contaminate water by leaching of equipment or disposal of wastes. Apply this product only as directed on the label.

TORAGE AND DISPOSAL: Store only in tightly closed, original container in a secure area inaccessible to children. Do not contaminate water, food or feed by storage or disposal. Waste resulting from the use of this product may be disposed on site or at an approved waste disposal facility. Do not reuse empty container. Triple rinse empty container with water. Return metal drums to reconditioner or purifier. Do not dispose of in a sanitary landfill or by other procedures provided by state and local authorities. Plastic containers may be disposed of in a sanitary landfill, incinerated or destroyed by local authorities, by burning, if burned stay out of smoke.
