

# BLEACH

(Sodium Hypochlorite—12.5% by weight)

**CLEANER — DEODORIZER**

**— WARNING —**

**(Keep Out of Reach of Children)**

Harmful if swallowed. Strong Oxidant. May produce chemical burns. Do not get on skin or in eyes. Do not use ammonia or other bowl cleaners with this product. To do so will release hazardous gases.

**— FIRST AID —**

In case of skin and eye contact, flush with plenty of water. If skin irritations persist, get medical attention. For eyes, get prompt medical attention. Internal—Give milk, water, or egg whites. Call Physician immediately.

"This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label."

**JUL 19 1978**

UNDER THE FEDERAL INSECTICIDE  
 FUNGICIDE AND RODENTICIDE ACT  
 THE ECONOMIC POISON REGISTER  
 NUMBER NO.

## DIRECTIONS

### SUGGESTED USE PATTERNS

"Always test for chlorine residual in a newly-filled pool before adding product, if pool has been filled from an already chlorinated municipal water system. If a residual of 1.0 - 1.5 is found no product will be needed initially.

To establish a chlorine residual in a newly-filled pool filled with previously unchlorinated water, add one pint (16 oz.) of product per 10,000 gallons of swimming pool water. Repeat dosage until a chlorine residual of 1.0-2.0 ppm is established as determined by the use of a chlorine test kit.

Add ½ pt. (8 oz.) for every 10,000 gals as needed to maintain a chlorine residual of 1.0-1.5 ppm. The quantity of these additions will vary with temperature, sunlight, bathing load and other factors. Test pool water frequently with a chlorine test kit to maintain the desired chlorine residual. Also the pool water should be maintained at pH 7.2 to 7.6 as determined by a pH test kit."

#### DO NOT STORE IN SUNLIGHT

Degrades with age. Use a test kit and increase dosage as necessary to obtain required level of available chlorine.

"Rinse empty container thoroughly with water and discard it."
