APPLICATIONS

Royal Algae-Rid is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using Royal Algae-Rid.

For pools having just visible algae growth add an initial dose of 75 to 115 fl. oz. of Royal Algae-Rid per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 41 to 75 fl. oz. of Royal Algae-Rid per 10,000 of water.

To maintain pools free of visible algae growth, subsequent additions of 13.5 to 27 fl. oz. of Royal Algae-Rid per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of Royal Algae-Rid throughout the water in the pool is necessary for maximum effectiveness.

Royal Algae-Rid is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Royal Algae-Rid can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Royal Algae-Rid with concentrated dry or liquid chlorine products.

MANUFACTURED BY:

Royal Chemical Corporation

ROYAL ALGAE-RID

Active ingredient

Poly (oxyethylene(dimethyliminio)ethylene (dimethyliminio)ethylene dichloride 10% Inert ingredient 90%

CAUTION

KEEP OUT OF THE REACH OF CHILDRED

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

See right panel for additional caution.
