

TERM-OUT

KILLS
TERMITES
ROACHES
ANTS

**CAUTION—KEEP OUT OF
REACH OF CHILDREN**
**SEE BACK PANEL FOR ADDITIONAL
PRECAUTIONARY STATEMENTS**

NET WT. 13 OZ.

CONTENTS

ACTIVE INGREDIENTS:

Resmethrin (5-(phenylmethyl)-3-Furanyl) Methyl 2,2-dimethyl-3-(2-methyl-1-propenyl) Cyclopropanecarboxylate	0.250%
Related Compounds	0.034%
Aromatic Petroleum Hydrocarbons	0.329%
Petroleum Distillates	29.385%
INERT INGREDIENTS	70.002%

**FOR USE IN HOMES, RESTAURANTS,
FOOD HANDLING ESTABLISHMENTS:**

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

TO KILL DRYWOOD TERMITES

Locate the termite hole. Usually drywood termites seal their hole with a plug that is the same color as the wood they are eating. Look for a spot (about the diameter of the needle on the hose attachment) that could be a plugged up hole. Push the needle through the plug and spray. **DO NOT FORCE THE NEEDLE** BECAUSE IT MAY CLOG OR BREAK. IF NECESSARY ENLARGE THE TERMITE HOLE WITH AN ICE PICK SO THAT THE NEEDLE MAY ENTER FREELY. Additionally, locate hollow areas by tapping. Use an ice pick or nail to make a hole for the needle. Insert the needle and spray for 5 seconds or until spray mist appears at the entry point or at another point in the wood. Inspect at six months and one year to insure that the entire colony has been killed.

TO KILL COCKROACHES

Use the needle to spray into cracks and crevices behind wall boards beneath and behind appliances and in other places where roaches may hide and breed. Apply the spray directly to the insects if possible. Repeat as necessary.

TO KILL ANTS

Spray directly on the ants contacting as many as possible with the spray. Spray ant trails and entry points around doors and windows. Follow ants back to their nest if possible. Insert the needle into the nest opening and spray. Repeat as necessary.

PRECAUTIONARY STATEMENTS HAZARD TO HUMANS AND PETS-CAUTION

Harmful if swallowed. Avoid breathing vapors or spray mist. Avoid contact with skin and eyes. In case of contact immediately flush eyes or skin with plenty of water. Brief irritation and tearing may occur. Obtain medical attention if irritation persists. If swallowed, do not induce vomiting. Call Surgeon 9348 or the Poison Center or a physician immediately. Remove pets and birds and cover fish aquariums before spraying.

FOOD PRECAUTIONARY

Do not apply directly to food in commercial food handling facilities. Cover or remove any food and food processing equipment during application. Do not apply where food processing is under way. After spraying in food processing plants wash all equipment with potable water, benches, shelving etc. where exposed food will be handled. In the home, all food processing surfaces and utensils should be covered during treatment and then be washed before use.

PHYSICAL OR CHEMICAL HAZARDS

Keep out of children's reach. Do not puncture. Do not use near heat or open flame. Exposure to temperatures above 120°F may cause bursting. Never throw container into fire. Do not use near flames, heat, pipes and finishes.

DISPOSAL

Do not use empty container as a container and put in trash collection.
