

U.S. ENVIRONMENTAL PROTECTION AGENCY
 Office of Pesticide Programs
 Registration Division (H7505C)
 401 "M" St., S.W.
 Washington, D.C. 20460

EPA Reg. Number:

~~35054-2~~
 35054-2

Date of issuance:

MAY 27 1993

Term of issuance: Conditional

Name of Pesticide Product:

Term-Out

NOTICE OF PESTICIDE:
 Registration
 Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Makiki Electronics
 54-122 Kamehameha Highway
 P.O. Box 729
 Hauula, HI 96717

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the following label changes:

- a. Revise the EPA Registration Number to read, "EPA Reg. No. 35054-2".
- b. Modify the Precautionary Statements subheading "Hazard to Humans and Pets" to read: "Hazards to Humans and Domestic Animals".
- c. Incorporate the following Precautionary Statement advise to your label: "Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes or on skin or clothing. Wash with soap and water after handling." Add any of the following language not already present in your Practical Treatment text.

If in eyes: Flush eyes with plenty of water. Get medical attention if irritation persists.

If on skin: Wash with plenty of soap and water. Get medical attention.

Signature of Approving Official:

Rita Kumar

Date:

5-26-93

- d. The precautionary statement beginning with the phrase, "After spraying. . .", should be expanded to read: "After spraying. . . wash all equipment (benches, shelving, etc.) where food will be handled with an effective cleaning compound followed by a potable water rinse.
3. Submit an acute inhalation test to satisfy guideline requirement 81-3 within eight months from the date of this conditional registration. In addition, submit a brief explanation of your manufacturing process (guideline 61-2) and a statement of any expected or unexpected impurities (guideline 61-3).
4. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Rita Kumar

Rita Kumar
Acting Product Manager 10
Insecticide & Rodenticide Branch
Registration Division (H7505C)

TERM-OUT.

KILLS TERMITES ROACHES ANTS

**CAUTION—KEEP OUT OF REACH OF CHILDREN
SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS**

**NET WT. 13 OZ.
368.5 GRAMS**
CONTENTS

ACTIVE INGREDIENTS:
permethrin [5-(phenylmethyl)-3-furanyl] Methyl 2,2-dimethyl-1-(2-methyl-1-propenyl) Cyclopropanecarboxylate .. 0.250%
INERT INGREDIENTS 99.75%

Contains 95.371% Carbifol L.G. Solvent

ACCEPTED
with COMMENTS
in EPA Letter Dated

MAY 27 1993

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

35054-2

3 of 14
**FOR USE IN HOMES, RESTAURANTS,
FOOD HANDLING ESTABLISHMENTS.**

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.
(HOLD THE NEEDLE END FIRMLY; USE SPARINGLY AND WITH ADEQUATE VENTILATION. WARNING: TERM-OUT IS A PAINT REMOVER! SPONGE EXCESS SPRAY OFF OF ALL FINISHED SURFACES PROMPTLY!)

TO KILL DRYWOOD TERMITES

Locate the termite hole. Termites seal their hole with a plug that is the same, or darker, color than the wood they are eating. Look for a spot (about the size of a small pin head) that could be a plugged up hole. Push the needle through the plug and spray. **DO NOT FORCE THE NEEDLE. IF NECESSARY ENLARGE THE TERMITE HOLE WITH AN ICE PICK.** If you can not locate the termite hole, locate hollow areas by tapping the wood with a small hard object and then make a hole into the hollow with an ice pick or a 1/16" drill. Spray into the termite hole, or drilled hole until you see the insecticide coming out the entry hole or some other place in the wood. Inspect for droppings at six months and one year to insure the colony has been killed.

TO KILL COCKROACHES

Use the needle to spray into the roach's home: cracks, hollow doors; behind loose base boards; beneath, behind and between the inside and outside walls of appliances and into other small places where roaches may hide and breed. Repeat as necessary. **(IMPORTANT NOTE: ROACHES WILL HIDE AND DIE IN PRIVATE AFTER BEING SPRAYED WITH TERM-OUT SO YOU MAY NOT SEE DEAD ROACHES)**

TO KILL ANTS

Follow the ant trail back to a hole in the wall or the ant nest. Insert the needle into the hole or ant nest and spray. Repeat as necessary.

PRECAUTIONARY STATEMENTS HAZARD TO HUMANS AND PETS—CAUTION

Harmful if swallowed. Avoid breathing vapors or spray mist. Avoid contact with skin or eyes. In case of contact, immediately flush eyes or skin with plenty of water. Brief irritation and tearing may occur. Obtain medical attention if irritation persists. If swallowed, do not induce vomiting. Call 1-800-735-9363 or 1-808-293-9348 or The Poison Center or a physician immediately. Remove pets and birds and cover fish tanks before spraying.

FOOD PRECAUTIONARY

Do not apply directly to food. In commercial food handling facilities, cover or remove any food and food processing equipment during application. Do not apply while food processing is under way. After spraying in food processing plants, wash all equipment with potable water, benches, shelving, etc., where exposed food will be handled. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not puncture or incinerate. Do not use or store near heat or open flame. Exposures to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator. Will harm some plastics and finishes.

DISPOSAL

Replace cap and discard container in trash. Do not incinerate or puncture.

EPA ESTABLISHMENT NO. 10900-CA-1
EPA REGISTRATION NO. 35054-2

INSTRUCTIONS THAT APPEAR ON THE COVER CAP

BEST AVAILABLE COPY

Roaches hide in dark, cramped spaces when lights are on. Roach eggs look like brown beans attached to walls or objects. Check for either in cluttered areas or objects that are not disturbed often and have small openings or hollow spaces. Portable appliances, hollow cabinet doors, drawer bottoms, piles of paper, bathroom scales and pictures can be home for roaches. Treat as necessary.

TERM-OUT has a 14" flexible extension, a metal injector tip and soft pad. Use in holes, reducing leakage and insecticide back. Spray back occurs when pressure is closed-off holes or from connections. Before spraying, the head and spray tip opening are pointed away from humans and pets.
