Mr. David H. Miller
Makiki Electronics
54-122 Kamehameha Highway
P. O. Box 729
Hauula, HI 96717

Dear Mr. Miller:

Subject: Revised Labeling
Term-Out, EPA Reg. No. 35054-2
Submission dated June 6, 1993

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. A copy of the label is enclosed for your records.

Your Confidential Statement of Formula, which you reference in response to guideline 61-2, only lists the chemical components of the product. In addition, you should identify the equipment used, any reactions occurring during the process, and conditions under which the processing occurs. Refer to Title 40 of the Code of Federal Regulations, parts 158.162 and 158.165.

Also, there is no problem with creating another test batch for the acute inhalation toxicity testing, so long as the "new" test batch is consistent with the formulation requirements of the registered product.

Sincerely,

Rita Kumar
Acting Product Manager 10
Insecticide & Rodenticide Branch
Registration Division (H7505C)

as amended, for the pesticide
registered under EPA Reg. No.

35054-2

USE IN HOMES, RESTAURANTS,
FOOD HANDLING ESTABLISHMENTS.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. (HOLD THE NEEDLE END FIRMLY; USE SPARINGLY AND WITH ADEQUATE VENTILATION. WARNING: TERM-OUT IS A PAINT REMOVER! SPONGE EXCESS SPRAY OFF OF ALL FINISHED SURFACES PROMPTLY!)

TO KILL DRYWOOD TERMITES

Locate the termite hole. Termites seal their hole with a plug that is the same, or darker, color than the wood they are eating. Look for a spot (about the size of a small pin head) that could be a plugged up hole. Push the needle through the plug and spray. DO NOT FORCE THE NEEDLE. IF NECESSARY ENLARGE THE TERMITE HOLE WITH AN ICE PICK. If you can not locate the termite hole, locate hollow areas by tapping the wood with a small hard object and then make a hole into the hollow with an ice pick or a 1/16" drill. Spray into the termite hole, or drilled hole until you see the insecticide coming out the entry hole or some other place in the wood. Inspect for droppings at six months and one year to insure the colony has been killed.

TO KILL COCKROACHES

Use the needle to spray into the roach's home: cracks, hollow doors; behind loose base boards; beneath, behind and between the inside and outside walls of appliances and into other small places where roaches may hide and breed. Repeat as necessary. (IMPORTANT NOTE: ROACHES WILL HIDE AND DIE IN PRIVATE AFTER BEING SPRAYED WITH TERM-OUT SO YOU MAY NOT SEE DEAD ROACHES)

TO KILL ANTS

Follow the ant trail back to a hole in the wall or the ant nest. Insert the needle into the hole or ant nest and spray. Repeat as necessary.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

Harmful if swallowed. Avoid breathing vapors or spray mist. Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes or on skin or clothing. Wash with soap and water after handling. Brief irritation and tearing may occur in case of eye contact; flush eyes with plenty of water. If on skin: Wash with plenty of soap and water. Get medical attention in case of skin or eye irritation. If swallowed, do not induce vomiting. Call 1-800-735-9363 or 1-808-293-9348 or The Poison Center or a physician immediately. Remove pets and birds and cover fish tanks before spraying.

FOOD PRECAUTIONARY

Do not apply directly to food. In commercial food handling facilities, cover or remove any food and food processing equipment during application. Do not apply while food processing is under way. After spraying in food processing plants wash all equipment (benches, shelving, etc.) where food will be handled with an effective cleaning compound followed by a potable water rinse. In the home all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not puncture or incinerate. Do not use or store near heat or open flame. Exposures to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator. Will harm some plastics and finishes.

DISPOSAL

Replace cap and discard container in trash. Do not incinerate or puncture.
