NET CONTENTS: 55 Gallons

HBH

SODIUM HYPOCHLORITE SOLUTION

ACTIVE INGREDIENT:

Sodium Hypochlorite 12.5%
Inert Ingredients: 87.5%
TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF CONTACT WITH EYES OCCURS, flush with water for at least 15 minutes. Get prompt medical attention.

IF CONTACT WITH SKIN OCCURS, wash with plenty of soap and water.

IF SWALLOWED, drink large amounts of water. DO NOT induce vomiting. Call a physician or poison control center immediately.

See additional precautions on side panel.

DIRECTIONS FOR USE

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT
IN A MANNER INCONSISTENT WITH ITS LABELING**

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage as necessary, to obtain the required level of available chlorine.

Refer to White Rox Chemical Company Solution Circular Nos. WR886-A-H for additional uses.

STORAGE AND DISPOSAL

Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

Empty container thoroughly with water and either return to manufacturer or discard by placing this container in trash collection.

WHITE ROX CHEMICAL COMPANY SODIUM HYPOCHLORITE SOLUTION

ACTIVE INGREDIENT:

SODIUM HYPOCHLORITE	12.5%
INERT INGREDIENTS	87.5%

DIRECTIONS FOR USE

CIRCULAR NO. WR886-H

**DISINFECTION OF POROUS AND NON-POROUS SURFACES
IN THE STI CHEM-CLAV APPARATUS/DEVICE**

RINSE/SPRAY METHOD- A solution of a minimum of 2550 ppm available chlorine may be used if a chlorine test kit is available. Solutions containing an initial concentration of a minimum of 2550 ppm available chlorine must be tested and adjusted periodically to insure the available chlorine does not drop below 2550 ppm. Prepare a 2550 ppm solution by thoroughly mixing 25.5 oz. of this product with 10 gallons of water. If no chlorine test kit is available, prepare a solution by thoroughly mixing 0.02 gallons per minute of this product with one gallon per minute of water to provide approximately 2550 ppm available chlorine by weight.

Operate the system in the manner outlined in the operating instructions for the device. A minimum of a three minute contact time for the solution on both porous and non-porous surfaces is automatically achieved by the apparatus.

Disinfectants used in the STI Chem-Clav automated system may be used for general cleaning of both porous and non-porous surfaces in the equipment.
