

CAUTION:

Keep out of reach of children. May be harmful if swallowed. Skin and eye contact may cause severe irritation. Avoid contact with skin and eyes. In case of contact flush with plenty of water. Do not use Ammonia or other bowl cleaners with this product. To do so will release hazardous gases.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water.

Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label. See opposite panel.

DEGRADES WITH ACF:

Use test kit and increase usage amount as required. Store in cool place away from sunlight.

EPA Reg. No. 35482 - 2

DIRECTIONS FOR WATER CHLORINATION USAGE:

This product is to be used for water chlorination as specified by your state and local authorities for specific site application only.

The amount of available chlorine required to disinfect drinking or waste water will depend upon the demand of system to be treated. As a guide, once the available chlorine demand has been satisfied, 12 ounces of Wilclor-2 per 10,000 gallons of water will yield 1.0 parts per million available chlorine.

Repackagers and formulators of disinfectants for individual consumer use must develop their own labels with adequate use directions for the claims on their labels.
