OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION

December 10, 2019

Rebecca Horton Consultant Howard Fertilizer and Chemical Co., Inc. P.O. Box 628202 Orlando, FL 32862-8202

Subject: Registration Review Label Mitigation for Prodiamine

Product Name: TURF PRIDE FERTILIZER WITH 0.50% PRODIAMINE

EPA Registration Number: 35512-50

Application Dates: 6/10/2019 Decision Numbers: 557616

Dear Ms. Horton:

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all the information submitted with your application to support the Registration Review of the above referenced product in connection with the Prodiamine Interim Decision, and has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

A copy of your label stamped "Accepted" is enclosed. Products shipped after 12 months from the date of this amendment must bear the new revised label. Your release for shipment of the product bearing the amended label constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6.

Page 2 of 2 EPA Reg. No. 35512-50 Decision No. 557616

If you have any questions about this letter, please contact Darius Stanton by phone at 703-347-0433, or via email at Stanton.darius@epa.gov.

Sincerely,

Linda Arrington, Branch Chief

PRODIAMINE GROUP

3 HERBICIDE

# TURF PRIDE® FERTILIZER with 0.50% **PRODIAMINE**

[Additional Brand Name(s): Turf Pride® AccuBlend<sup>TM</sup> Fertilizer with 0.50% Prodiamine; John Deere Fertilizer with 0.50% Prodiamine; Turf Pride® AccuBlend™ Fertilizer with 0.50% Barricade Pre-Emergence Herbicide]

#### PRE-EMERGENCE HERBICIDE

For pre-emergence control of weed grasses and broadleaf weeds in established turf grasses, lawns, golf course fairways (not for putting greens), and sod farms. Use around landscape ornamentals, including established perennials and wildflower plantings.

ACTIVE INGREDIENT: Prodiamine<sup>3</sup> OTHER INGREDIENTS: Total (CAS No. 2909-21-2)

> NET WT 50 POUNDS (22.7 kg) **READ ENTIRE LABEL BEFORE USING**

## KEEP OUT OF REACH OF CHILDREN CAUTION

#### FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the National Pesticide Information Center at 1-800-858-7378 for emergency medical treatment information.

If swallowed:

Call poison control center or doctor immediately for

	Have person sip a glass of water if able to swallow.     Do not induce vomiting unless told to do so by the poison control center or doctor.     Do not give anything by mouth to an unconscious person.
If in Eyes:	Hold eye open and rinse slowly and gently with water for 15-20 minutes.
	Remove contact lenses, if present, after the first 5
	minutes, then continue rinsing eye.
	Call a poison control center or doctor for treatment advice.
If on skin	Take off contaminated clothing.
or clothing:	Rinse skin immediately with plenty of water for 15-20
	minutes.
	Call a poison control center or doctor for treatment
	advice.
If inhaled:	Move person to fresh air.
	<ul> <li>If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if</li> </ul>

#### PRECAUTIONARY STATEMENTS

· Call a poison control center or doctor for further

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequent repeated skin contact while handling the material may cause allergic reactions in some individuals

#### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear long-sleeved shirt and long pants; chemical resistant gloves; shoes plus socks; and a dust mask. Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

## **User Safety Recommendations**

<u>Users should:</u> Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean

#### **ENVIRONMENTAL HAZARDS**

NON-TARGET ORGANISM ADVISORY STATEMENT: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize drift.

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment wash water

## **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation

Do not graze or feed livestock forage or hay cut from areas treated with this product. Do not apply aerially. Failure to follow the directions for use and precautions on this label may result in poor weed control, illegal residues, damaged turf or ornamental plants

#### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests and nurseries and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard (sod farms, commercial nurseries.

<u>Do not enter</u> or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. <u>PPE required</u> for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls; chemical resistant gloves such as butyl rubber > 14 mils or natural rubber > 14 mils or Nitrile rubber > 14 mils; and shoes plus socks.

#### NON-AGRICULTURAL USE REQUIREMENTS

The requirements of this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The "WPS" applies when this product is used to produce agricultural plants on farms, forests, or nurseries. Applicators and handlers should wear long-sleeved shirt, long pants, chemical resistant gloves, shoes with socks, and protective evewear. Thoroughly wash face and hands with soap and water after exposure and before eating or smoking. Launder exposed clothing before reuse. Do not allow reentry to treated areas until dusts have settled and the turfgrass or soil is dry.

## ACCEPTED

Dec 10, 2019

Under the Federal Insecticide, Fungicide and Rodenticide Act as amended, for the pesticide registered under

EPA Reg. No.

35512-50

This product is a turf fertilizer and a pre-emergence herbicide that provides residual control of many grass and broadleaf weeds in established turf grasses, golf courses (excluding putting greens), for soc farms, and lawns, and around landscape ornamentals, established perennials and wildflower plantings. It controls susceptible weeds by inhibiting weed seed germination and root development. Most effective weed control will be obtained when this product is activated by at least ½ inch of rainfall, irrigation, or shallow (1 to 2 inches) incorporation, prior to weed seed germination and within 14 days following application. Do not graze or feed livestock forage cut from areas treated with this product. Do not apply aerially. Do not apply to golf course putting greens. Failure to follow the directions for use and precautions on this label may result in poor weed control, crop injury, or illegal residues.

#### HERBICIDE RESISTANCE MANAGEMENT

For resistance management, Turf Pride® Fertilizer with 0.50% Prodiamine is a Group 3 herbicide. Any weed population may contain or develop plants naturally resistant to this product and other Group 3 herbicides. The resistant biotypes may dominate the weed population if these herbicides are used repeatedly in the same field. Appropriate resistance-management strategies should be followed. To delay herbicide resistance, take one or more of the following steps:

- Rotate the use of this product or other Group 3 herbicides within a growing season sequence or among growing seasons with different herbicide groups that control the same weeds in a field.
- Use tank mixtures with herbicides from a different group if such use is permitted; where information on resistance in target weed species is available, use the less resistance-prone partner at a rate that will control the target weeds(s) equally as well as the more resistance-prone partner. Consult your local extension service or certified crop advisor if you are unsure as to which active ingredient is currently less prone to resistance.
- Adopt an integrated weed-management program for herbicide use that
  includes scouting and uses historical information related to herbicide use
  and crop rotation, and that considers tillage (or other mechanical control
  methods), culture (e.g., higher crop seeding rates; precision fertilizer
  application method and timing to favor the crop and not the weeds),
  biological (weed-competitive crops or varieties) and other management
  practices.
- Scout after herbicide application to monitor weed populations for early signs of resistance development. Indicators of possible herbicide resistance include: (1) failure to control a weed species normally controlled by the herbicide at the dose applied, especially if control is achieved on adjacent weeds; (2) a spreading patch of non-controlled plants of a particular weed species; (3) surviving plants mixed with controlled individuals of the same species. If resistance is suspected, prevent weed seed production in the affected area by an alternative herbicide from a different group or by a mechanical method such as hoeing or tillage. Prevent movement of resistant weed seeds to other fields by cleaning harvesting and tillage equipment when moving between fields, and planting clean seed.
- If a weed pest population continues to progress after treatment with this
  product, discontinue use of this product, and switch to another
  management strategy or herbicide with a different mode of action, if
  available
- Contact your local extension specialist or certified crop advisors for additional pesticide resistance-management and/or integrated weedmanagement recommendations for specific crops and weed biotypes.
   For further information or to report suspected resistance, contact your
- For further information or to report suspected resistance, contact your local sales representative, crop advisor or extension agent.
- Follow HRAC and WSSA Best Management Practices, including: Plant into weed-free fields and keep fields as weed-free as possible. To the extent possible, use a diversified approach toward weed management. Whenever possible, incorporate multiple weed-control practices such as mechanical cultivation, biological management practices and crop rotation. Fields with difficult to control weeds should be rotated to crops that allow the use of herbicides with alternative mechanisms of action or different management practices. To the extent possible, do not allow weed escapes to produce seeds, roots or tubers. Prevent field-to-field and within-field movement of weed seed or vegetative propagules. Thoroughly clean plant residues from equipment before leaving fields. Prevent an influx of weeds into the field by managing field borders. Identify weeds present in the field through scouting and field history and understand their biology. The weed-control program should consider all of the weeds present. Difficult to control weeds may require sequential applications of herbicides with differing mechanisms of action. Apply this herbicide at the correct timing and rate needed to control the most difficult weed in the field. Use a broad-spectrum soil-applied herbicide with a mechanism of

action that differs from this product as a foundation in a weed-control program. Do not use more than two applications of this or any other herbicide with the same mechanism of action within a single growing season unless mixed with an herbicide with another mechanism of action with an overlapping spectrum for the difficult-to-control weeds. If resistance is suspected, treat weed escapes with an herbicide with a different MOA or use non-chemical methods to remove escapes.

Contact your local sales representative, crop advisor, or extension agent
to find out if suspected resistant weeds to this MOA have been found in
your region. If resistant biotypes of target weeds have been reported, use
the application rates of this product specified for your local conditions.
Tank mix products so that there are multiple effective mechanisms of
actions for each target weed.

#### **APPLICATION DIRECTIONS**

Apply uniformly with suitable calibrated application equipment. Do not apply otherwise.

#### **ESTABLISHED TURF**

This product is a pre-emergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grass and lawns. The maximum amount of material that may be applied per year is given for each turf grass species in the **Maximum Annual Rates** section of this label. Most effective weed control in turf grasses will be obtained when this product is activated by at least ½ inch of rainfall or irrigation prior to weed seed germination and within 14 days following application. See map for approximate crabgrass seed germination dates.

#### **USE PRECAUTIONS**

The following precautions apply to the use of this product in turf grasses and lawns: (1) Application of this product may thin emerged annual bluegrass and newly overseeded grasses. (2) Do not apply to overseeded turf within 60 days after seeding or until after the second mowing whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil. (3) Do not cut (harvest) treated sod before 120 days after application. Do not apply to newly set sod until the following year. (4) Application to turf stressed by drought, low fertility, or pest damage may result in turf injury. (5) Disturbing the herbicide barrier with cultural practices such as disking may result in reduced weed control. (6) Do not apply this product to putting greens, or areas where dichondra, colonial bentgrass, velvet bentgrass, or annual bluegrass (*Poa annua*) are desirable species.

#### Rates of Application

This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds. Maximum use rate selection should be based on turf species. The length of time of residual pre-emergence weed control provided by this product is related to the rate applied.

#### **MAXIMUM ANNUAL RATES**

This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum yearly rate as given in the following table

Maximum application rate of this product per calendar year by turfgrass species (1)		
Turf Species	Lbs. Product/Acre	Lbs. a.i./Acre
Creeping Bentgrass	130 lbs.	0.65 lbs
Creeping Red Fescue	150 lbs.	0.75 lbs.
Buffalograss Kentucky Bluegrass Perennial Ryegrass	200 lbs.	1.00 lbs.
Bermudagrass (2) Bahiagrass Centipedegrass Seashore Paspalum St. Augustinegrass Tall Fescue (including turf type) Zoysia	300 lbs.	1.50 lbs.

- (1) These are the maximum rates per calendar year by species limitations.
- (2) May be used on newly-sprigged or plugged Bermudagrass at rates not to exceed 100 lbs. per acre. Newly-sprigged or plugged Bermudagrass stolon rooting may be temporarily retarded. Suppression only of Foxtail, Goosegrass and Rescuegrass due to reduced product rates used in sprigging situations.

   Do not apply more than 300 lbs. of this product to the same area per calendar
- Do not apply more than 300 lbs. of this product to the same area per calendar year.
  Use the higher rates of this product to achieve higher levels of fertility and
- Use the higher rates of this product to achieve higher levels of fertility and longer periods of weed control for each turf type, but do not exceed the maximum application rates as specified in the Maximum Annual Rates table.

#### **WEEDS CONTROLLED**

When used in accordance with this label, this product will provide control of the following weeds

Purslane, Common Pusley, Florida Rescuegrass (3) Barnyardgrass Henbit Bluegrass, Annual Itchgrass Johnsongrass (Poa annua) Carpetweed Chickweed, Common (from seed) Shepherd's Purse (2) Signalgrass, Broadleaf Junglerice Chickweed, Mouseear Knotweed Speedwell, Persian Sprangletop (from seed) Kochia Crabgrass (Large, Smooth) Lambsquarter, Common Spurge, Prostrate Crowfootgrass Cupgrass, Woolly Lovegrass
Panicum (Texas, Witchgrass Woodsorrel, Yellow Foxtails, Annual Fall, Browntop) (from seed)

(1) In many areas a single application of 130 to 300 lbs. per acre will control goosegrass. However, under heavy goosegrass pressure and/or an extended growing season, most effective weed control may be obtained by making an initial application of 150 to 200 lbs. per acre followed after 60 to 90 days by a second application at doses that would not exceed those give in the Maximum Annual Rates table. Do not exceed the maximum rate for turf grass species listed in the Maximum Annual Rates table on this label.

(2) Application for Shepherd's purse should be made in late summer, fall, or winter prior to germination.

(3) Suppression only of rescuegrass.

Pigweed

Goosegrass (1)

Sequential application may be made so long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf species. All applications must be made prior to germination of the

WHEN TO APPLY AFTER OVERSEEDING TURE

Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil.

#### WHEN TO OVERSEED AFTER APPLICATION

This product will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the table below for best overseeding and/or reseeding results.

Product	Months Before Overseeding			
Rate Lbs/Acre	a.i./Acre	Northern	Transition	Southern
100	0.50	4	4	4
130	0.65	5	4	4
150	0.75	6	5	5
160	0.80	-	6	6
200	1.00	-	7	7
228	1.14	-	-	9
260	1.30	-	-	10
300	1.50	-	-	12

Application Equipment and Spreader Settings
The size and bulk density of granules in this product may vary; therefore, calibrate your granular applicator prior to application of this product. Follow directions in the owner's manual for calibrating your spreader. The settings indicated in the following table should only be used as a guide in calibrating your

#### LANDSCAPE ORNAMENTALS INCLUDING **ESTABLISHED WILD FLOWER PLANTINGS**

This product may be applied for residual pre-emergence control around Ornamentals as listed.

#### **USE RATES**

Apply 130 to 300 lbs. per acre (2.98 lbs. to 6.89 lbs. per 1,000 sq. ft.) of landscape plants, in fall and/or spring. Use higher rates of application for longer control periods. Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rate of 300 lbs. per acre

#### APPLICATION TIMING AND INFORMATION

Apply uniformly to the surface of the soil in ornamental planting beds with a granular applicator. Calibrate your applicator to assure appropriate dosage as described above under "Use Rates", prior to application. Calibrate your applicator as described in the owner's manual. The bulk density of this product may vary; therefore, to assure that the product is applied at the rates described, you must use a calibrated applicator.

This product is a pre-emergence herbicide and will not control emerged weeds. Most effective weed control in ornamentals will be obtained when this product is activated by at least ½ inches of rainfall or irrigation, or with shallow (1 to 2 inches) mechanical incorporation, prior to weed seed germination and within 14 days following application.

Best weed control is obtained when this product is applied to soil free of clods, weeds, and debris such as leaves. Prior to application of this product, control existing vegetation by hand weeding, cultivation, or the use of an appropriate post-emergence herbicide

#### **ESTABLISHED LANDSCAPE ORNAMENTALS**

This product may be applied to established ornamentals as a broadcast, over the top, or directed application. Irrigation or rainfall soon after application will wash residues off plant foliage and activate this product in the soil

NEWLY TRANSPLANTED LANDSCAPE ORNAMENTALS

This product may be applied to newly transplanted ornamentals as a broadcast, over the top, or directed application. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply after cuttings form roots and become established. Apply before budding/grafting or after buds/grafts have taken to avoid any inhibition of the tissue union. Irrigate after application as above directed.

#### **TOLERANT ORNAMENTAL SPECIES**

This product will not harm most trees, shrubs, vines and flowers. The species listed here are tolerant to this product. Best results will be obtained when this product is uniformly applied to the soil surface. This product may be applied over the top of these species, provided spray residue on shoots of plants is washed to the soil by over the top irrigation or by adequate rain soon after application.

## STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE: Store in original container away from other fertilizer, feed, or foodstuffs and separated from other pesticides. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill empty bag. Completely empty bag into application equipment. Offer for recycling, if available, or dispose of empty bag in a sanitary landfill or at an incineration facility or, if allowed by State and local authorities, by burning locally. If burned, stay out of smoke.

If product is spilled, sweep up and use as per label instructions or dispose of as indicated above.

# KEEP OUT OF REACH OF CHILDREN CAUTION

#### **FIRST AID**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the National Pesticide Information Center at 1-800-858-7378 for emergency medical treatment; information

resticide illioilli	iation Center at 1-000-030-7370 for emergency medical		
treatment inform	ation.		
If swallowed:	Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.		
If in Eyes:	<ul> <li>Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>		
If on skin or clothing:	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.		
If inhaled:	Move person to fresh air.     If person is not breathing, call 911 or an ambulance, ther give artificial respiration, preferably by mouth-to-mouth, if		

## PRECAUTIONARY STATEMENTS

· Call a poison control center or doctor for further

possible

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequent repeated skin contact while handling the material may cause allergic reactions in some individuals.

### **ENVIRONMENTAL HAZARDS**

NON-TARGET ORGANISM ADVISORY STATEMENT: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize drift.

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment wash water.

## **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Not for use in commercial greenhouses, nurseries, on sod farms or grass grown for seed. For residential use only.

Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or on lawns and grounds.

Do not graze or feed livestock forage or hay cut from areas treated with this product. Do not apply aerially. Failure to follow the directions for use and precautions on this label may result in poor weed control, illegal residues, damaged turf or ornamental plants.

#### Approximate Dates of Craborass Germination

Northern Zone	After May 10
Transitional Zone	After April 20
Upper Southern Zone	After Mar. 20
Southern States	Jan 1 to Mar. 20

This product is a turf fertilizer and a pre-emergence herbicide that provides residual control of many grass and broadleaf weeds in established turf grasses, golf courses (excluding putting greens), for sod farms, and lawns, and around landscape ornamentals, established perennials and wildflower plantings. It controls susceptible weeds by inhibiting weed seed germination and root development. Most effective weed control will be obtained when this product is activated by at least ½ inch of rainfall, irrigation, or shallow (1 to 2 inches) incorporation, prior to weed seed germination and within 14 days following application. Do not graze or feed livestock forage cut from areas treated with this product. Do not apply aerially. Do not apply to golf course putting greens. Failure to follow the directions for use and precautions on this label may result in poor weed control, crop injury, or illegal residues.

#### APPLICATION DIRECTIONS

Apply uniformly with suitable calibrated application equipment. Do not apply otherwise.

#### **ESTABLISHED TURF**

This product is a pre-emergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grass and lawns. The maximum amount of material that may be applied per year is given for each turf grass species in the **Maximum Annual Rates** section of this label. Most effective weed control in turf grasses will be obtained when this product is activated by at least ½ inch of rainfall or irrigation prior to weed seed germination and within 14 days following application. See map for approximate crabgrass seed germination dates.

#### **USE PRECAUTIONS**

The following precautions apply to the use of this product in turf grasses and lawns: (1) Application of this product may thin emerged annual bluegrass and newly overseeded grasses. (2) Do not apply to overseeded turf within 60 days after seeding or until after the second mowing whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil. (3) Do not cut (harvest)

EPA Reg. No. 35512-50 June 10, 2019 – revised EPA Est. No.

treated sod before 120 days after application. Do not apply to newly set sod until the following year. (4) Application to turf stressed by drought, low fertility, or pest damage may result in turf injury. (5) Disturbing the herbicide barrier with cultural practices such as disking may result in reduced weed control. (6) Do not apply this product to putting greens, or areas where dichondra, colonial bentgrass velvet bentgrass, or annual bluegrass (Poa annua) are desirable species.

#### Rates of Application

This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds. Maximum use rate selection should be based on turf species. The length of time of residual pre-emergence weed control provided by this product is related to the rate applied.

#### **MAXIMUM ANNUAL RATES**

This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum yearly rate as given in the following

Maximum application rate of this product per calendar year by turfgrass species (1)	
Turf Species	Lbs. Product/1000 ft <sup>2</sup>
Creeping Bentgrass	3 lbs.
Creeping Red Fescue	3.5 lbs.
Buffalograss Kentucky Bluegrass Perennial Ryegrass	4.5 lbs.
Bermudagrass (2) Bahiagrass Centipedegrass Seashore Paspalum St. Augustinegrass Tall Fescue (including turf type) Zoysia	7.0 lbs.

- (1) These are the maximum rates per calendar year by species limitations. (2) May be used on newly-sprigged or plugged Bermudagrass at rates not to exceed <u>2.25 lbs. per 1000 ft²</u>. Newly-sprigged or plugged Bermudagrass stolon rooting may be temporarily retarded. Suppression only of Foxtail, Goosegrass and Rescuegrass due to reduced product rates used in sprigging situations.

  • Do not apply more than 7 lbs. of this product to the same 1000 ft² area per
- Use the higher rates of this product to achieve higher levels of fertility and longer periods of weed control for each turf type, but do not exceed the maximum application rates as specified in the Maximum Annual Rates table.

#### **WEEDS CONTROLLED**

When used in accordance with this label, this product will provide control of the

lollowing weeds.		
Barnyardgrass	Henbit	Purslane, Common
Bluegrass, Annual	Itchgrass	Pusley, Florida
(Poa annua)	Johnsongrass	Rescuegrass (3)
Carpetweed	(from seed)	Shepherd's Purse (2)
Chickweed, Common	Junglerice	Signalgrass, Broadleaf
Chickweed, Mouseear	Knotweed	Speedwell, Persian
(from seed)	Kochia	Sprangletop
Crabgrass (Large, Smooth)	Lambsquarter, Common	Spurge, Prostrate
Crowfootgrass	Lovegrass	Witchgrass
Cupgrass, Woolly	Panicum (Texas,	Woodsorrel, Yellow
Foxtails, Annual	Fall, Browntop)	(from seed)
Goosegrass (1)	Pigweed	

- (1) In many areas a single application of 3 to 7 lbs. per 1000 ft<sup>2</sup> will control goosegrass. However, under heavy goosegrass pressure and/or an extended growing season, most effective weed control may be obtained by making an initial application of 3 to 4.5 lbs. per 1000 ft<sup>2</sup> followed after 60 to 90 days by a second application at doses that would not exceed those give in the Maximum Annual Rates table. Do not exceed the maximum rate for turf grass species listed in the Maximum Annual Rates table on this label.
- (2) Application for Shepherd's purse should be made in late summer, fall, or winter prior to germination.
- (3) Suppression only of rescuegrass.

Sequential application may be made so long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf species. All applications must be made prior to germination of the

WHEN TO APPLY AFTER OVERSEEDING TURF

Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil.

#### WHEN TO OVERSEED AFTER APPLICATION

This product will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the table below for best overseeding and/or reseeding results.

Product Rate	Months Before Overseeding		
Lbs/1,000 ft <sup>2</sup>	Northern	Transition	Southern
2.25	4	4	4
3	5	4	4
3.5	6	5	5
3.7	-	6	6
4.5	-	7	7
5.25	-	-	9
6	-	-	10
7	-	-	12

Application Equipment and Spreader Settings
The size and bulk density of granules in this product may vary; therefore, calibrate your granular applicator prior to application of this product. Follow directions in the owner's manual for calibrating your spreader. The settings indicated in the following table should only be used as a guide in calibrating your

#### LANDSCAPE ORNAMENTALS INCLUDING **ESTABLISHED WILD FLOWER PLANTINGS**

This product may be applied for residual pre-emergence control around Ornamentals as listed.

<u>USE RATES</u>
Apply 3 lbs. to 7 lbs. per 1,000 ft<sup>2</sup> of landscape plants, in fall and/or spring. Use higher rates of application for longer control periods. Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rate of 7 lbs. per 1000 ft<sup>2</sup>.

#### **APPLICATION TIMING AND INFORMATION**

Apply uniformly to the surface of the soil in ornamental planting beds with a granular applicator. Calibrate your applicator to assure appropriate dosage as described above under "Use Rates", prior to application. Calibrate your applicator as described in the owner's manual. The bulk density of this product may vary; therefore, to assure that the product is applied at the rates described, you must use a calibrated applicator.

This product is a pre-emergence herbicide and will not control emerged weeds Most effective weed control in ornamentals will be obtained when this product is activated by at least ½ inches of rainfall or irrigation, or with shallow (1 to 2 inches) mechanical incorporation, prior to weed seed germination and within 14 days following application.

Best weed control is obtained when this product is applied to soil free of clods, weeds, and debris such as leaves. Prior to application of this product, control existing vegetation by hand weeding, cultivation, or the use of an appropriate post-emergence herbicide.

#### **ESTABLISHED LANDSCAPE ORNAMENTALS**

This product may be applied to established ornamentals as a broadcast, over the top, or directed application. Irrigation or rainfall soon after application will wash residues off plant foliage and activate this product in the soil.

#### NEWLY TRANSPLANTED LANDSCAPE ORNAMENTALS

This product may be applied to newly transplanted ornamentals as a broadcast, over the top, or directed application. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply after cuttings form roots and become established. Apply before budding/grafting or after buds/grafts have taken to avoid any inhibition of the tissue union. Irrigate after application as above directed

EPA Reg. No. 35512-50 June 10, 2019 - revised

TOLERANT ORNAMENTAL SPECIES

This product will not harm most trees, shrubs, vines and flowers. The species listed here are tolerant to this product. Best results will be obtained when this product is uniformly applied to the soil surface. This product may be applied over the top of these species, provided spray residue on shoots of plants is washed to the soil by over the top irrigation or by adequate rain soon after application.

Hosta, Plantain Lily (Fragrant)	Hosta plantaginea
Hosta, "Searsucker"	H. Sieboldiana
,	Houttuynia cordata var. variegata
Bigleaf Hydrangea	Hydrangea macrophylla
Chinese Holly	llex cornuta
Japanese Holly; Helleri	I. crenata
American Holly	I. opaca
Holly	I. pernyi
Yaupon Holly; Schillings	I. vomatoria
	Inula ensifolia
Sword-Leaved Iris; Jodelsong	Iris ensata
Siberian Iris; Cabernet	Iris siberica
Iris species**	Iris spp.**
Winter Jasmine	Jasminium udiflorum
Chinese Juniper; Nick's Compact, Parsonnii	Juniperus chinesis
Shore Juniper; Blue Pacific	J. conferta
Parsoni	J. davurca
Creeping Juniper	J. horizontalis
Walnut*	Juglans sp.
Shrimp Plant	Justicia brandegeana Lagerstromia
Crane Myrtle	Indica Lagerstromia indica
Crape Myrtle: Tuscarora	Fauriei
Crape Myrtle; Tuscarora Weeping Lantana	Lantana montevidensis
Lavender; Munstead	Lavender sp.
Edelweiss	Leontopodium alpinum
Chinese Privet; Variegata	Ligustrum sinense
Amur Privet	L. amurense
Japanese Privet	L. japonicum
Glossy Privet (Waxleaf)	L. lucidum
Lily; Jazz Big Blue Lily; Turf;	Lillum sp.
Silver Mound; Evergreen Giant	Liriope muscari
Liriope, Variegated	Liriope Muscari var.
zmopo, vamogatou	variegate
Liriope, Creeping	Liriope spicata
Cardinal Flower, Indian Pink	Lobelia Cardinalis
Japanese Honeysuckle	Lonicera japonica
Tatarian Honeysuckle	L. tatarica
Burgundy	Loropetalum chinense
Loosestrife; Modern Pink Magnolia species**	Lythrum sp.
Magnolia species**	Magnolia spp.**
Ice Plant	Maleophora luteola
Crabapple*	Malus sp.*
Yaku Jima, Silberfeder	Miscanthus sinensis
Heavenly Bamboo	Nandina domestica
Narcissus species**	Narcissus spp.**
Oleander	Nerium oleander
Olive*	Olea europea*
Mondo Grass	Ophiopogon japonicus
Osmanthus (False Holly): Gulf Tide	Osmanthus heterphyllus
Trailing African Daisy Sourwood	Osteospermum fruticosum Oxydendrum arboreum
Sourwood Tree Peony	Paeonia suffruticosa
Fountain Grass (Dwarf)	Pennisetum setaceumi
. Samani Grado (Dwaii)	Perovskia atriplicifolia
Avocado*	Persea americana
Frasier's Photinia (Redtip)	Photinia fraseri
Dragonhead, False; Vivid	Physotegia Viginiana
Spruce species** (Colorado, Blue, Norway,	Picea spp.**
etc.)	Pieris japonica
etc.) Lily-of-the-Valley Bush	
Lily-of-the-Valley Bush	Pinus brutia
Lily-of-the-Valley Bush Calabrian Pine	Pinus brutia P. canariensis
Lily-of-the-Valley Bush Calabrian Pine Canary Island Pine	
Lily-of-the-Valley Bush Calabrian Pine Canary Island Pine Slash Pine	P. canariensis

EPA Reg. No. 35512-50 June 10, 2019 – revised

For Use Around Landscape	Ornamentals
Including established perennials and	
Common Name	Scientific Name
Almond, Apricot, Nectarine, Peach, Plum &	Prunus sp.*
Prune*	,
Douglas Fir**	Pseudotsuga menziesii**
Firethorn (Scarlet)	Pyracantha coccinea
Firethorn	P. fortuneana
Firethorn	P. koidzumii
Bradford Pear sp.	Pyrus sp.
Oak, Shumard's Red	Quercus Shumardii
Oak species	Quercus spp.
Indian Hawthorne	Raphiolepsis indica
Yedda Hawthorn	Raphiolepsis umbellata
Coral Bells, Delaware Valley White, Flame	Rhododendron (including
Creeper, Formosa, Girard Crimson, George	Azalea)
L. Tabor, Hino-crimson, PJM, Roseum	
Elegans, Wakeiebisu, White Gumbo	
Lady Bank's Rose*	Rosa banksiae*
Rosemary*	Rosmarinus officinalis*
Black-Eyed Susan; Goldstrum	Rudbeckia sp.
Santolina	Santolina, virens
Saxifrage; Purple Dome	Saxifraga sp.
Pincushion Flower	Scabiosa sp.
Stonecrop	Sedum album
Stonecrop; Lidakense	Sedum cauticola
Stonecrop	Sedum dasyphyllum
Stonecrop; Dragon's Blood	Sedum spurium
Spirea: Anthony Waterer	Spiraea Bumalda
Australian Brushcherry	Syzygium paniculatum
Japanese Yew	Taxus cuspidata
Yew	T. media
Germander	Teucrium sp.
Meadow Rue	Thalictrum dipterocarpum
American Arborvitae	Thuja occidentalis
Star Jasmine	Trachelospermum asiatum
Canada Hemlock	Tsuga canadensis
Tulip species	Tulipa spp.
Veronica, Speedwell; Sunny Border	Veronica sp.
Japanese Viburnum	Viburnum japonicum
Sweet Viburnum	V. odoratissimum
Japanese Snowball	V. plicatum
Canary Island Viburnum	V. rigidum
Arrow wood Viburnum	V. suspensum
Laurustinus	V. tinus
Cranberry Bush Leatherleaf Viburnum	V. trilobium
Leatherleaf Viburnum	V. wrightii
Greater Periwinkle, Vinca	Vinca major
Common Periwinkle, Vinca	Vinca minor
Grape*	Vitis sp.*
Old Fashioned Weigela	Weigela florida
Spanish Bayonet, Yucca	Yucca aloifolia
Adam's Needle, Yucca	Y. filamentosa

<sup>\*</sup>Do not use on food producing trees, vines or plants

## STORAGE & DISPOSAL

**PESTICIDE STORAGE:** Store in original container away from other fertilizer, feed, or foodstuffs and separated from other pesticides. **PESTICIDE DISPOSAL:** *If partly filled* — Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

CONTAINER DISPOSAL: If empty – Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

If product is spilled, sweep up and use as per label instructions or dispose of as indicated above.

[For Florida: FLORIDA APPLICATIONS: For use on golf courses or other athletic turf in FL, we recommend you follow SL191, "Recommendations for N, P, K & Mg for Golf Course and Athletic Field Fertilization Base on Mehlich I Extractant", available on the internet at <a href="http://edis.ifas.ufl.edu/SS404">http://edis.ifas.ufl.edu/SS404</a>.

FLORIDA APPLICATIONS: For commercial application to urban turf or lawns in FL, we recommend you follow the Best Management Practices for Protection of Water Resources in Florida, June 2002, Florida Green Industries, available on the internet at

http://www.dep.state.fl.us/central/Home/MeetingsTraining/FLGreen/BMP Book final.pdf.]

#### **CONDITIONS OF SALE & WARRANTY**

Read the entire Directions for Use, Conditions, Disclaimer of Warranties, and Limitation of Liability before using this product. If the terms are not acceptable, return the unopened container at once. By using this product, user and buyer accept the following Conditions, Disclaimer of Warranties, and Limitations of Liability.

CONDITIONS: The directions for use of this product are believed to be adequate and should be followed carefully. However it is impossible to eliminate all risks associated with the use of this product. Injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Howard Fertilizer & Chemical Co., Inc. All such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: To the extent consistent with applicable law,

DISCLAIMER OF WARRANTIES. To the extent consistent with applicable law, there are no warranties express or implied, of merchantability or of fitness for a particular purpose or otherwise, which extend beyond the statements made on this label. No agent of Howard Fertilizer & Chemical Co., Inc. is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. To the extent consistent with applicable law, Howard Fertilizer & Chemical Co., Inc. disclaims any liability whatsoever for special, incidental, or consequential damages resulting from the use or handling of this product.

LIMITATION OF WARRANTIES: To the extent consistent with applicable law, the exclusive remedy of the user or buyer for any and all losses, injuries or damages resulting from the use or handling of this product, whether in contract warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price, or at **Howard Fertilizer & Chemical Co., Inc.'s** option, the replacement of the product.

Howard Fertilizer & Chemical Co., Inc. P.O. Box 628202, Orlando, FL 32862-8202
