Subject: Notifications for Revised Warranty Statement under PRN 98-10 and PRN 2007-4

Dear Ms. Horton:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notices (PRN) 98-10 and 2007-4 dated February 11, 2008 for:

EPA Registration 35512-55 Turf Pride Fertilizer with 0.055% Bifenthrin Insecticide

EPA Registration 35512-56 Turf Pride Lawn Food with Trimec Herbicide

The Registration Division (RD) has conducted a review of the requests for applicability under PRN 98-10 and PRN 2007-4 and finds that the label changes requested fall within the scope of PRN-98-10 and PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identify the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Joyce Edwards of my staff at 703-308-5479.

Sincerely,

A handwritten signature in cursive script, appearing to read "Linda Arrington".

EPA Est. No. 35512-FL-2

WHERE TO USE: This product may be used on all varieties of Zoysiagrass, Bermudagrass, Centipedegrass, St. Augustinegrass, Bahiagrass, Bentgrass, Fescues and Bluegrass.

WHEN TO USE: Apply when weeds are young and actively growing in the spring, summer or fall. Best results will be obtained if applied in the morning when dew is on the grass and when daily temperatures range from 65° to 90°F. For lawns that are heavily over-run by hard-to-kill weeds or in a state of poor growth due to low moisture conditions, a second treatment in 30 to 45 days may be necessary.

The maximum application rate to turf is 0.5 lb. 2,4-D acid equivalent per acre per application site. The maximum number of broadcast applications per treatment site is 2 per year.

HOW TO APPLY: Mow lawn to normal height 1 to 2 days before application. Water lawn thoroughly, as needed, at least 1 day before application to sustain moisture until the next watering (1-2 days after application). Choose a calm day to ensure uniform coverage and avoid spreading granules onto non-target plants. If grass is not moist at time of application, sprinkle lightly with water to hold the material and prevent dust drift onto non-target plants. Wait 1-2 days following application, then water treated area thoroughly.

To check for your spreader settings refer to your spreader manual details and apply 10 pounds of product to cover 1,000 sq. ft. of turfgrass. During application, close spreader openings when turning.
