## SPP ALGAE-OUT

SPP ALGAE-OUT is an extremely concentrated algaecide with super killing power on black and green algae. SPP ALGAE-OUT may be used for super-chlorinating and shock treatments of pools using SPP CONCENTRATED CHLORINATING TABLETS for normal residual chlorine maintenance.

### DIRECTIONS FOR USE TO ELIMINATE ALGAE GROWTH

1. Turn off filter pump before application.
2. Treat pool only when not in use.
3. Sprinkle SPP ALGAE-OUT directly over the pool walls and floor on which algae appears. Use approximately 1 pound per 10,000 gallons of pool water. For severe cases the dosage may be doubled.
4. Filter pump can be turned on after SPP ALGAE-OUT has been in the pool for at least 8 hours.
5. Brush pool again with stainless steel brush and then vacuum.
6. Do not use pool until chlorine residual has dropped to 3.0 ppm or less, as determined by a suitable test kit.
7. Repeat treatment such as once a week or when visible algae occurs.

### TO SUPERCHLORINATE

1. Check residual chlorine with a reliable test kit. If below 1.0 ppm broadcast over the deepest end of the pool 4 oz. of SPP ALGAE-OUT for every 12,000 gallons of water. Repeat application until a 1.0 to 1.5 ppm residual chlorine is obtained.
2. In extremely hot weather or extreme bathing loads, a shock dosage of chlorine may be obtained by broadcasting SPP ALGAE-OUT directly into pool water. 1 oz. of SPP ALGAE-OUT for each 6,000 gallons of pool water will provide 1.1 ppm of chlorine.
3. Measure pH immediately after application and at least once each week with a reliable pool test kit. Adjust pH to 7.2-7.6. If necessary add a suitable agent such as SPP DRY ACID\* (sodium bisulfite) to lower pH, or SPP SODA ASH\* to increase pH.

\*Follow instructions for use on labels of these products.

### — DANGER —

**WARNING: KEEP OUT OF REACH OF CHILDREN**  
**CORROSIVE.** Causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wash hands after handling.

**FIRST AID:** If swallowed feed gruel, cooked cereal, or bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Remove and wash contaminated clothing before reuse.

### DANGER: STRONG OXIDIZING AGENT.

Mix only with water. Use clean dry utensils. Contamination by moisture, organic matter, or other chemicals may liberate hazardous gases. Store in a cool, dry, well ventilated area away from heat or open flame. Decomposes at 350-475 degrees F with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air. Flood with large amounts of water. Keep container tightly closed when not in use. Rinse empty container thoroughly with water to dissolve all material before discarding.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.
