Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SPA ALGAE RAIDER is used to control the growth of algae in exterior spas, whirlpools, and hot tubs. For maximum effectiveness spas, whirlpools, and hot tubs containing heavy growth of algae should be cleaned prior to using SPA ALGAE RAIDER.

Spas, whirlpools, or hot tubs having just visible algae growth require an initial dose of 8 to 12 fluid ounces of SPA ALGAE RAIDER per 1,000 gallons of water. For treatment of a freshly cleaned and filled spa, whirlpool, or hot tub, add initially 4 to 8 fluid ounces of SPA ALGAE RAIDER per 1,000 gallons of water. Subsequent additions of 1 to 3 fluid ounces of SPA ALGAE RAIDER should be made every 5 to 7 days after initial treatment for maintenance.

SPA ALGAE RAIDER is compatible with those chemicals normally used to treat spas and is effective at both acid and alkaline pH. SPA ALGAE RAIDER can be used in spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix SPA ALGAE RAIDER with concentrated dry or liquid chlorine products.

STORAGE: Keep container closed when not in use. Leaking or damaged containers should be placed in a plastic bag and discarded in trash. Mop up spills with clear water. All pesticides should be kept out of reach of children and stored away from food.

DISPOSAL: Do not reuse empty container. Wrap container and place in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.
