

General Purpose Roach & Ant Killer #1

**A FAST ACTING INSECTICIDE THAT
KILLS THE ACCESSIBLE OR
EXPOSED STAGES OF MANY
DIFFERENT PESTS.**

CONTROLS:

- ROACHES
- ANTS
- CRICKETS
- SPIDERS
- WASPS
- HORNETS
- FLIES
- GNATS
- SCORPIONS
- BED BUGS
- SILVERFISH
- MOSQUITOS
- FLYING MOTHS
- FRUIT FLIES
- CLOVER MITES
- CHEESE MITES

ALSO CONTROLS THESE STORED PRODUCT PESTS:

- Granary Weevil
- Rice Weevil
- Drugstore Beetle
- Carpet Beetle
- Spider Beetle
- Cigarette Beetle
- Meal Worms
- Grain Mites
- Angoumois Grain Moth
- Mediterranean Flour Moth
- Indian Meal Moth
- Tobacco Moth
- Cheese Skippers
- Saw-toothed Grain Beetle
- Confused Flour Beetle
- Rust-red Beetle

ACTIVE INGREDIENTS:	100%
Pyrethrin	0.15%
Piperonyl Butoxide, Technical	1.80%
Petroleum Distillate	98.05%
Equivalent to 1.2% of (butylcarbityl) (6-propylpiperonyl) ether and to 0.3% of related compounds	

KEEP OUT OF REACH OF CHILDREN.

CAUTION

Harmful if swallowed,
inhaled or absorbed through the skin.
See back panel for additional precautions.

EPA Reg. No. 35897-13
EPA Est. No. 35897-TX-1

NET CONTENTS:

When the plant is not in operation, foods should be covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Remove any birds, pets or fish aquariums before spraying. Repeat treatment when reinfestation occurs.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For maximum insect control, a combination localized surface application and space treatment is recommended.

SPACE SPRAY

For rapid control of household fruit flies, mosquitoes, flying moths and gnats. Close doors and windows and shut off ventilating systems. Use a good sprayer adjusted to deliver a fine mist, directing spray toward the upper portions of the enclosure and filling the room with mist. Use 1 to 1 1/2 ounce of spray for each 1000 cubic feet of space. Keep area closed for at least 10 min. after spraying. Vacate area after treatment and ventilate before reoccupying.

VAPOR SPRAY: General Purpose Spray is a potent spray that permits its use as a fog or vapor treatment in special electric, steam or compressed air equipment. Use in accordance with manufacturers' directions for the individual type of applicator selected. Dosages vary with different generators, but many such applicators are designed to give most effective results when the material is used at 1 pint to each 8,000 - 15,000 cubic feet of space. In all cases, dosage should be sufficient to fill thoroughly the enclosure with fog or vapor. Insects controlled will be the same as given for "Space Spray" above.

SURFACE SPRAY: To control Roaches, Silverfish, Crickets, Spiders, Clover Mites, Scorpions, Cheese Mites, Cheese Skippers, Spider Beetles, use General Purpose Spray in a good machine adjusted to deliver a coarse droplet spray using approximately 1 gallon of material to each 750 square feet of surface. Spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places, contacting insects whenever possible.

AGAINST ANT INFESTATIONS, treat shelves, cabinets, and storage areas, spray ant runs, trails, baseboards, thresholds and other places of entry, and treat nest liberally.

TO CONTROL BEDBUGS effectively, apply liberally to top, ends, sides and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frames, directing the liquid into all cracks and lock joints. Treat walls, baseboards, moldings, floors, closets, and bedroom furniture, picture frames, with particular attention to protected bedbug hiding and breeding places.

TO CONTROL CARPET BEETLES effectively, apply to floor areas and baseboards. Spray directly into cracks, crevices, and under carpets where insects may be found. Treat both the underside and top side of infested carpets. Spray inside of trunks, closets and infested areas of shelving.

STORED GRAIN OR FLOUR INSECTS: General Purpose Spray is also useful in mills, elevators, granaries, warehouses, food storages, and other situations where an effective, fast-acting insecticide is required for control of the exposed stages of: Granary weevils, rice weevils, Cigarette beetle, Drugstore beetle, carpet beetle, saw-toothed grain beetle, rust-red flour beetle, confused flour beetle, Angoumois grain moth, Mediterranean flour moth, Indian meal moth, Tobacco moth, meal worms and grain mites. As a space or vapor spray, it gives a rapid kill of flying and crawling stages. In cracks and crevices of floors, it is effective in the control of the grain insects.

FOR TREATMENT OF FLOORS AND SINKS: General Purpose Spray not only gives rapid initial kill of the accessible stages of most stored grain and food product pests, listed in the previous paragraph, but gives some continuing protection in cracks and crevices where insects hide. Apply in a good machine, adjusted to deliver a coarse droplet using approximately 1 gallon of material to each 750 square feet of surface. Repeat applications as needed.

...with a high pressure spray nozzle, wash a
...storage and handling area thoroughly with particular attention
...cracks, crevices, and similar protected locations. Waste grain, dust,
and debris should be removed and destroyed, and storage areas cleaned
before spraying. Treat unloading, handling and processing areas as
apply the insecticide to conveying, processing and handling equipment:
the inside of reel sifter, purifier conveyors, sifters, roll housings and
hoppers, pick-up conveyors, etc. Spray thoroughly around the base of
heavy machinery and equipment.
For in transit protection and control, treat truck beds, box cars and
ships' holds before loading. For extended protection and control in
warehouses and food product storages, treat exposed surfaces as
recommended above, and spray heavily cracks, crevices, recesses,
hiding and breeding areas. Thoroughly treat walls, floors, shelves and
other exposed surfaces, and lightly spray each layer of cartons of
containers as stacked.

AS A CONTACT SPRAY General Purpose Spray is also very effective
when used as a contact spray against mosquitoes, gnats, wasps, hornets,
skippers, scorpions and cheese mites. When the insects are present
contacting them with a fine mist will provide immediate kill. Spraying
walls, ceilings, lights, moldings, screen doors and door frames, beams
and light cords will make these locations unfavorable as resting or hiding
places for these insects.

DISPOSAL
DO NOT REUSE EMPTY CONTAINER.
WRAP CONTAINER AND PUT IN TRASH COLLECTION.
For larger container sizes (5gal. and up) dispose as follows:
Pesticide, spray mixture, or rinse water that cannot be used
according to label instructions must be disposed of according
to applicable Federal, State or Local procedures.
METAL CONTAINERS: Triple rinse (or equivalent). Then offer
for recycling or reconditioning, or puncture and dispose of in a
sanitary landfill, or by other approved state or local procedures.
PLASTIC CONTAINERS: Triple rinse (or equivalent). Then offer
for recycling or reconditioning, or dispose of in a sanitary
landfill, or by incineration if allowed by state and local
authorities.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

- CAUTION**
1. If swallowed, do not induce vomiting. Call a physician immediately.
 2. If on skin, wash thoroughly and get medical attention if irritation persists.
 3. If in eyes, flush with plenty of water and get medical attention if irritation persists.
 4. If inhaled, remove victim to fresh air. Apply artificial respiration if indicated.

Keep away from food, feedstuffs and domestic water supplies.
Wash thoroughly after handling. If swallowed, do not induce
vomiting. Call a physician immediately.

NOTE TO PHYSICIAN: Contains petroleum distillate. If gastric
lavage is deemed necessary, undertake only after proper
placement of a cuffed endotracheal tube. Active ingredients
contain a cholinesterase inhibitor. Treat symptomatically.
Atropine is an antidote.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, birds and other wildlife. Do not
apply directly to water. Do not contaminate water by cleaning
equipment or disposal of waste. Apply only as specified on this
label.
