- WRAF SPENT PROCESSOR UNIT IN NEWSPAPER AND DISCARD IN TRASH.
- SEE ENCLOSED CIRCULAR FOR DIRECTIONS FOR USE.
- EPA REG. NO. 35920-1
- EPA ESTAB. NO. 35920-FL-1

SYI-34 WATER PROCESSOR™

CAUTION KEEP OUT OF REACH OF CHILDREN

ACTIVE INGREDIENT, SILVER 1%

INERT INGREDIENTS, 99%

Specifications for SYI-34 Water Processors™

What is a System 1™ Water Processor?

A System 1 Water Processor™ is a device that affects the water quality by controlling the mineral content by removing objectionable material from the tap water.

System 1 processes oligodynamic levels of silver to inhibit proliferation of bacteria in the unit.

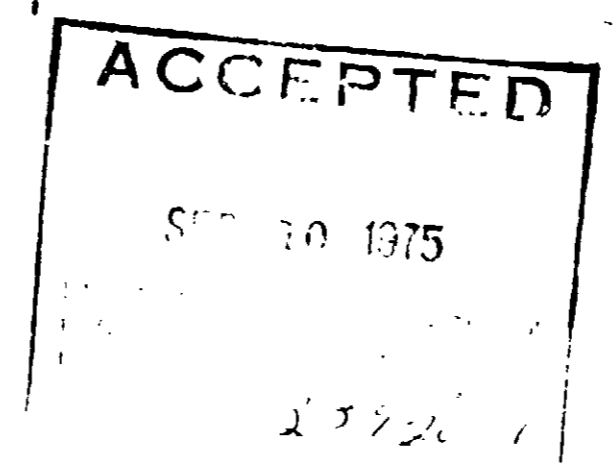

The principle of operation of the System 1 process is that silver ions are suspended on the inert carrier in an oligodynamic or finely divided form, so that the solubility is limited to meter trace quantities.

System 1™ Water Processors demonstrated bacteriostatic activity when laboratory tested.

System 1 series water processors are advantageous for the removal of the mineral taste and objectionable odor that may be present in potable tap water and require no maintenance during operation life.

Since minerals are still in solution, you will still notice clean, white centers in your ice cubes and a white ring in a pot if you completely boil water away. This confuses some people. Also, while the unit is new, you may notice some harmless, tiny, white air bubbles. These will soon disappear.

How to adjust your processor flow. Always keep it less than 1 gpm for SYI-34. To do this, use the adjustment knob on the valve which connects under your sink to your cold water lead. This is a pin-type valve. Occasionally, dirt or mineral matter or other matter becomes lodged in the orifice behind the tap water to the processor and the processor slows considerably. If this happens, simply turn the handle to the complete clockwise position, then readjust to the normal flow rate. This dislodges the foreign matter.

The New System 1™ WaterProcessor™

What is a System 1 WaterProcessor?

The System 1 WaterProcessor is a new, revolutionary water purification system. It is designed to provide clean, pure water for drinking, cooking, and other household uses. The System 1 WaterProcessor is a compact, easy-to-use unit that can be installed in your kitchen or office. It is a truly innovative water purification system that will give you the cleanest, purest water available.

System 1 WaterProcessor has demonstrated bacteriostatic activity when laboratory tested.

The System 1 WaterProcessor is a truly innovative water purification system that will give you the cleanest, purest water available. It is a compact, easy-to-use unit that can be installed in your kitchen or office. The System 1 WaterProcessor is a truly innovative water purification system that will give you the cleanest, purest water available.

What does it do?

The System 1 WaterProcessor is designed to provide clean, pure water for drinking, cooking, and other household uses. It is a compact, easy-to-use unit that can be installed in your kitchen or office. The System 1 WaterProcessor is a truly innovative water purification system that will give you the cleanest, purest water available.

Where should it be used?

The System 1 WaterProcessor is designed to provide clean, pure water for drinking, cooking, and other household uses. It is a compact, easy-to-use unit that can be installed in your kitchen or office. The System 1 WaterProcessor is a truly innovative water purification system that will give you the cleanest, purest water available.

How does it work?

The System 1 WaterProcessor is designed to provide clean, pure water for drinking, cooking, and other household uses. It is a compact, easy-to-use unit that can be installed in your kitchen or office. The System 1 WaterProcessor is a truly innovative water purification system that will give you the cleanest, purest water available.

The other advantages of the System 1.

- Compact design
- Easy to use
- No moving parts
- No electricity required
- No maintenance required
- No taste or odor
- No lead or other contaminants
- No bacteria or viruses
- No chlorine or other chemicals
- No filter changes
- No water waste
- No noise
- No heat
- No cold
- No hot
- No dry
- No wet
- No clean
- No dirty
- No good
- No bad
