DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for Spring start up, superchlor nate with 1, pint (5 ozs.) of HIGH PO-CHIOR sodium hypochloriste for each 1000 gallons of water, This dotage is equivalent to 5 ppm available chlorine by weight.

For Pool Maintenance:

- A) Adjust pool water pH to 7.2 to 7.6 and maintain.
- B) Add manually or by a feeder davice HIGH-PO-CHLOR sodium hypochlorite at a rate to maintain an available Chlorine residual of 0 to 1.0 ppm. One fourth (1) pint (5 ozs.) of High-Po-Chlor sodium hypochlorite for each 5000 gallons of water will provide 1.0 ppm available chlorine by weight, frequency of additions to maintain 0 to 1 0 available chlorine will depend on temperature and number of swimmers. Use test kit to make certain the pH and chlorine residual are in the proper range.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner, Just before using rinse all surfaces thoroughly with 200 ppm of High-Po-Chlor Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after Chloring treatment. Do not soak overnight. Use one part High Po-Chlor to 650 parts of water for a 200 ppm solution.

THIS PROBUCT IS TOXIC TO FISM.
Treated effluent should not be discharged where it will drain into takes, streams, pends, or public water.

On not contaminate water by cleaning of equipment, or disposal of wastes.
