DISCUSSION FOR USE
GENERAL CLASSIFICATION

It is a violation of Federal law to use this product with its labeling.

ALGALCIDE GNF is used to control the growth of algae in pools. For maximum effectiveness, pools should be cleaned prior to using ALGALCIDE GNF.

For preventing and controlling algae growth in 97 to 100 fluid ounces of ALGALCIDE GNF water and remove settled algae debris by cleaning.

For treatment of freshly cleaned and filled pools, 97 fluid ounces of ALGALCIDE GNF per 10,000 gallons.

To maintain pools free of visible algae growth, 24 to 48 fluid ounces of ALGALCIDE GNF of water should be made every 5 to 7 days after.

ALGALCIDE GNF is compatible with the use to treat pools and effective at both acid and alkaline pH. It can be used in pools treated with chlorine. Reduce the amount of those chemicals normally used in pools. ALGALCIDE GNF with chlorine produces.

STORAGE & DISPOSAL: Keep container closed and contain water, food, or feed by storage of container. Do not reuse empty container. Trip and in case of container in an incinerator or in a large body of water. Bury the container in a hole in the ground of 18 inches deep, approved for the site, away from water supply. Green.
