

**PRECAUTIONARY
STATEMENT
HAZARDS TO HUMANS
(& DOMESTIC ANIMALS)**

CAUTION

Avoid Contamination of Foods

ENVIROMENTAL HAZARDS

This product is toxic to fish. Do not discharge treated effluent where it will drain into lakes, streams, or ponds

**PHYSICAL
OR CHEMICAL HAZARDS**

Harmful if swallowed. Not normally irritating to skin. Mildly irritating to eyes

STORAGE AND DISPOSAL

STORAGE: Keep container closed when not in use

PROHIBITIONS: Do not discharge treated effluent where it will drain into lakes, streams, or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes

DISPOSAL: Triple Rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill or bury in a safe place

ALGAECIDE 10NF

ACTIVE INGREDIENT 10.0 Percent
Poly[oxyethylene (dimethyliminio) ethylene-
(dimethyliminio) ethylene dichloride]

INERT INGREDIENT 90.0 Percent
THIS PRODUCT CONTAINS 0.85 LBS. OF ACTIVE
INGREDIENT PER GALLON AND WEIGHS 8.49 LBS.
PER GALLON

**— KEEP OUT OF REACH OF CHILDREN —
CAUTION**

IF SWALLOWED: Give patient doses of powdered charcoal immediately or all he can swallow of raw egg white, milk, gruel, of flour and water. Then induce vomiting with salt, soap or mustard in warm water

IF ON SKIN: Flush with plenty of water for at least 15 minutes

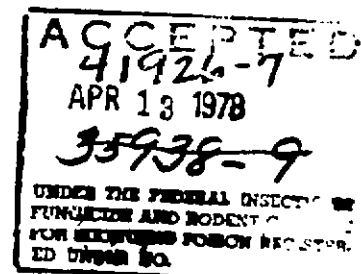

IF IN EYES: Flush eyes with plenty of water for at least 15 minutes. If eye irritation persists, get medical attention

Sarver, Pennsylvania 16055

**ESTABLISHMENT NO.: 35938-PA-01
EPA REGISTRATION NO.: 35938-9**

NET CONTENTS: 1 U.S. Gallon

GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling

DIRECTIONS FOR USE

ALGAECIDE 10NF is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using ALGAECIDE 10NF. For pools having just visible algae growth, add an initial dose of 37 to 57 fl. ozs. of ALGAECIDE 10NF per 10,000 gallons of water and remove settled algae debris by cleaning

For treatment of a freshly cleaned and filled pool, add initially 20 to 37 fl. ozs. of ALGAECIDE 10NF per 10,000 gallons of water

To maintain pools free of visible algae growth, subsequent additions of 7 to 14 fl. ozs. of ALGAECIDE 10NF per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment

ALGAECIDE 10NF is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. ALGAECIDE 10NF can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGAECIDE 10NF with concentrated dry or liquid chlorine products
