MOLD PREVENTATIVE

CONTROLS AND INHIBITS MOLD GROWTH AND ITS ODORS

DANGER: KEEP OUT OF REACH OF CHILDREN

Read warning on back label

Controls and inhibits visible mold growth on environmental surfaces such as air conditioners and associated ductwork, refrigeration systems, painted walls and ceilings, floors, shower areas and other similar surfaces where mold is a problem.

NET WT 8 OZ

ACCEPTED
MAR 30 1992
Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 35951-1

INSTRUCTIONS

To treat an air conditioner, dry the evaporator of any moisture. This may be done by operating the blower with the cooling unit off until dry, expose the evaporator.

All surfaces to be treated should be cleaned if necessary dry, then sprayed until covered with a mist. Repeat application when new growth appears.

- Film may be removed with alcohol.
 - Avoid lacquer surfaces.
- Use only in well ventilated areas.

DANGER

Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator. Heated decomposition produces very toxic fumes.

Harmful if swallowed. Avoid breathing spray mist or vapors. May cause eye damage. Do not get in eyes. Repeated exposure may damage the nervous system or cause paralysis.

Active ingredient	
2,2-Methyl-3-nitro-1,1-dichloroethane (4-Chlorophenoxy) ethyl dimethyl phosphite	1.45%
Inert ingredients	98.55%
