PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

C A U T I O N

May be harmful if swallowed. Avoid breathing dust. Avoid contact with clothing, skin or eyes.

STATEMENT OF PRACTICAL TREATMENT

In case of contact, flush skin or eyes with plenty of water. Get medical attention if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates. Drift and runoff from treated areas may be hazardous to aquatic invertebrates in adjacent aquatic sites. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Storage and disposal statement for homeowner use packages (cardboard & plastic)

STORAGE AND DISPOSAL

Pesticide disposal: Do not contaminate food or feed by storage or disposal. Store away from heat. Keep container tightly closed. Do not re-use container. Securely wrap container in several layers of newspaper and discard in trash.

Storage and disposal statement for commercial packages (lined Kraft bags)

STORAGE AND DISPOSAL

Storage: Do not contaminate food or feed by storage or disposal. Store away from heat. Keep packages dry.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Completely empty bag into application equipment. Then dispose of bag in a sanitary landfill, by incineration or, if allowed by State and local authorities, by burning. If burned stay out of smoke.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. DO NOT USE ON PASTURE, RANGELAND OR OTHER GRAZED AREAS.

LOGIC Fire Ant Bait is an insect growth regulator with a mode of action specific to insects, and therefore has less influence on non-target organisms

Logic Fire Ant Bait is very easy and convenient to apply (see use directions below). LOGIC Fire Ant Bait is slow acting, but very effective for control of fire ants. Following application, LOGIC Fire Ant Bait is collected by worker ants and distributed throughout the colony. Within 3 to 5 weeks there is considerable ant mortality and a continual decline of the fire ant colony.

METHODS OF APPLICATION

Apply LOGIC bait when ants are actively foraging. This is usually when soil temperatures are above 60 F. Avoid application during excessively hot period of the day or when the grass is wet. Heavy rainfall within 2 or 3 hours of application may reduce effectiveness.

In cases where reinfestation occurs or when very large mounds remain active, retreatment may be desirable after 3 to 4 months.

Single Mound Treatment: Apply 1 to 3 level tablespoons of LOGIC bait per mound, uniformly distributing material 3 to 4 feet around the base of the mound. Do not contaminate kitchen utensils by use or storage.

Broadcast Application: Apply uniformly with ground equipment calibrated to give the correct dosage. Apply at 1 to 1.5 lb/A.

Aerial Application: Apply uniformly with aerial equipment calibrated to give the correct dosage. Apply at 1 to 1.5 lb/A. Do not apply when weather conditions favor drift from treated areas.

FOR USE ON TURF, LAWNS AND OTHER NON-AGRICULTURAL LAND INCLUDING, BUT NOT LIMITED TO AIRPORTS, PARKS AND GOLF COURSES: Apply as directed

FOR USE ON NON-BEARING CITRUS: Apply as directed. For best results apply LOGIC fire ant bait in the spring prior to initial planting and make annual treatments each spring until one year before bearing. Do not apply within one year of the first harvest. Do not apply to non-bearing citrus more than twice per year.

DO NOT APPLY TO PASTURE, RANGELAND OR OTHER AREAS WHICH MAY BE GRAZED BY CATTLE, SHEEP OR OTHER DOMESTIC ANIMALS.
