 REREGISTRATION

(Under the Federal Insecticide, Fungicide,  
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

MAAG LOGIC FIRE ANT KILLER

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

MAAG Agrochemicals  
HLE Science  
P.O. Box X  
Vero Beach, FL 32901

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others. This registration is being issued in accordance with section 3(c)(7)(B) of FIFRA subject to the following conditions:

1. It is understood that you will submit/cite all data required for registration or reregistration of your product under section 3(c)(5) of FIFRA when the Agency requires all registrants of similar products to submit such data.
2. The Registration Number which has been assigned to this product must appear on the label as EPA Reg. No. 35977-27
3. You will submit five copies of finished printed labels before you release the product for shipment as required by PR Notice 82-2 dated June 18, 1982. Your finished printed labels must also comply with the general labeling requirements of 40 CFR §162.10. Refer to the A-79 enclosure for a description of finished printed labeling.

A stamped copy of the draft label is enclosed for your records. Your release of the product for shipment constitutes acceptance of these conditions. If the conditions are not complied with, the registration will be subject to cancellation in accordance with section 6(c) of FIFRA.

MAAG LOGIC  
FIRE ANT KILLER

HOW MAAG LOGIC FIRE ANT KILLER WORKS

MAAG LOGIC Fire Ant Killer is a unique combination of a natural food-like bait and a patented Insect Growth Regulator (IGR). Fire ants seek out the bait, take it back to the mound and feed it to the queen and other fire ants. The active ingredient (IGR) breaks the reproductive cycle. Without new fire ants to forage for food the queen and her colony die of starvation usually in 4 to 6 weeks, depending on the size of the mound. DURING THIS PERIOD IT IS IMPORTANT NOT TO USE ANY OTHER FIRE ANT REMEDY AS IT MIGHT IMPAIR THE SEASON-LONG EFFECTIVENESS OF MAAG LOGIC FIRE ANT KILLER.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. MAAG LOGIC is for use on lawns, turf and non-agricultural land.

When to apply

MAAG LOGIC should be applied in early spring, at the first sign of fire ant activity. If you live in an area of heavy fire ant infestation, you may want a second application 8 to 12 weeks after the initial treatment. In very large mounds, some worker ants may persist for awhile after the queen is dead.

MAAG LOGIC should be applied during late afternoon. Avoid application during the heat of the day or if rain is expected within 4 to 6 hours. Do not water your lawn for 24 hours after treatment.

How to apply

For best results, treat as follows:

Apply 1 to 3 tablespoons uniformly 3 to 4 feet around the base of each mound. Do not use kitchen utensils. The contents of this container will treat up to 20 medium size mounds.

After treating all visible mounds, sprinkle product thinly over remainder of yard using shaker side of top. MAAG LOGIC does not have to be distributed evenly or completely cover the area. The contents of this container will treat up to 27,000 sq. ft. when used as a broadcast yard treatment.

BROADCASTING MAAG LOGIC TO TREAT THE WHOLE YARD IS RECOMMENDED AS IT ELIMINATES FIRE ANT NESTS WHICH HAVE YET TO MOUND.

BACK LABEL (cont'd)

Where to apply

In addition to all visible mounds, MAAG LOGIC should be applied to the perimeter of the yard as protection against infestation from adjoining property. Special attention should be given to favored infestation areas such as flower gardens or other places where the ground has turned, around tree trunks and the edges of paved walkways and driveways.

Mound Treatment

PRECAUTIONARY STATEMENTS  
HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

May be harmful if swallowed. Avoid breathing dust. Avoid contact with clothing, skin or eyes.

STATEMENT OF PRACTICAL TREATMENT

In case of contact, flush skin or eyes with plenty of water. Get medical attention if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates. Drift and runoff from treated areas may be hazardous to aquatic invertebrates in adjacent aquatic sites. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL

Disposal: Do not contaminate food or feed by storage or disposal. Store away from heat. Keep container tightly closed. Do not re-use container. Securely wrap container in several layers of news-  
paper and discard in trash.
