[Left Panel]**PRECAUTIONARY STATEMENTS****HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: May be harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from humans, domestic animals, and pets. Keep away from feed or foodstuffs. Wear waterproof gloves when handling bait or retrieving carcasses. Wash thoroughly with soap and water after handling bait.

ENVIRONMENTAL HAZARDS

This product is toxic to mammals, birds, and fish. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

ENDANGERED SPECIES CONSIDERATIONS

NOTICE: It is a Federal offense to use any pesticide in a manner that results in the death of an endangered species. Use of this product may pose a hazard to endangered or threatened species. Before applying this product, applicators must obtain information regarding the occurrence of endangered species and use limitations for this product. You may call EPA's "Endangered Species Hotline" at 1-800-447-3813 to obtain an "Interim Measures" pamphlet for your county. You may also consult your local agricultural extension office or state pesticide lead agency to determine if there are any requirements for use of this product.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store only in original closed container in a cool, dry place inaccessible to children and pets. Store separately from fertilizer and away from products with strong odors which may contaminate the bait and reduce acceptability. Carefully sweep up and dispose of any spillage as in the "**PESTICIDE DISPOSAL**".

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of at on site or at an approved waster disposal facility.

CONTAINER DISPOSAL:

PLASTIC: Triple rinse (or equivalent). Then offer for recycling of reconditioning, or puncture and dispose of in a sanitary landfill, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

NOTICE

Seller makes no warranty, expressed or implied, concerning use of the product other than indicated on the label. Buyer assumes all risk of use and/or handling of product when such use and/or handling is contrary to label.

[Right Panel]**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

USE RESTRICTIONS: Use this product only to control pocket gophers species (Thomomys spp. and Geomys spp) in subsoil applications (only) in yard and garden areas around homes. Bait must be deposited in pocket gopher's natural under ground runways three to four days in a row. Do not apply bait above ground. Do not apply this product by means of a burrow-builder machine. Do not apply in food or feed crops

Do not apply this product by any method not specified on this label. This product may not be broadcast. Wear waterproof gloves when applying this product. With detergent and hot water, wash all implements used for applying bait. Do not use these implements for mixing, holding, or transferring foods or feeds.

APPLICATION DIRECTIONS:
HAND APPLICATION ONLY

Location of Runways: To locate a gopher's natural runway, probe about 6" to 8" from an active mound, beginning on the flat side of the horseshoe-shaped depression. Using an iron bar, a strong stick, the probe from a probe'n Funnel kit, a Gopher Bait Applicator bait dispensing probe, or a Gopher Getter Midget bait-dispensing probe, or other suitable implement, probe 8" to 10" below the soil level. Soil resistance on probe will decrease when runway is entered.

Application Directions:

1. Gopher Bait Applicator Method:

Turn hand probe unit upside down to attach or remove bait bottle which screws into the dispenser. The 1-lb. container for Gopher Getter Type 2 Bait by Wilco may be screwed directly into the dispenser. Otherwise, add the amount of bait needed to the bottle that comes with the Gopher Bait Applicator and screw the bottle into the dispenser. Using probe end, probe around mounds to locate runways (see "Locating runways;" above). Lift handle three times to deposit bait in each active runway. Pick up or bury any spilled bait immediately. Makes 2-7 bait sets per burrow system, depending upon the systems apparent length. For best results, this bait must be placed in gopher's active runway for four (4) consecutive days or until activity ceases.

2. Hand and Probe 'n Funnel Application Methods:

Enlarge probe hole (if necessary) to accommodate baiting. Use gloves and scooping device (preferably long-handled) to transfer the bait from container to the bait applicator. Insert one-half cup bait into each active runway through probe opening or through the funnel, if using the Probe 'n Funnel kit. Take care not to spill bait on the surface. Pick up any spilled bait immediately. Make 2-7 bait sets per burrow system, depending on the system's apparent length. For best results, this bait must be placed in gopher's active runway for four (4) consecutive days or until activity ceases

3. Gopher Getter Midget:

Remove cap from built-in bait reservoir and fill with bait. Replace and tighten cap. Using probe, probe around mounds to locate runways. To deposit bait in each active runway, turn crank six full turns, stopping back at the closed position. For best results, this bait must be placed in gopher's active runway for four (4) consecutive days or until activity ceases

Closing of Runways: After bait application, cover probe opening with sod or dirt. Do not permit dirt to sift in or cover bait

POST-APPLICATION DIRECTIONS:

Using waterproof gloves, collect and burn (where permitted) or bury all visible dead animals. Dispose of leftover bait according to "Pesticide Disposal".
