RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT

am-chlor

(Sodium Hypochlorite Solution)

Active Ingredients: Sodium Hypochlorite: 12.5%
Inert Ingredients: 87.5%

WARNING
KEEP OUT OF REACH OF CHILDREN

See side panel for first aid and additional precautions.

ENVIRONMENTAL PRECAUTIONS

This product is toxic to fish. Treated pool effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning equipment or disposal of wastes. Apply only as specified.

NET CONTENTS 1 GALLON

EPA REG. NO. 36118-2 EPA EST. NO. 36118-MD-01

DIRECTIONS

Initial Dosage: Add 5 ounces of Am-Chlor per 5000 gallons of water (this is the equivalent of 1.0 ppm available chlorine). Test with a chlorine test kit to establish a residual of available chlorine between .6 and 1.0 ppm. If the initial treatment is not enough add smaller amounts as needed as determined by testing with a test kit. Maintain the pH of the water at all times between pH 7.2 and 7.6 as determined by frequent testing with a suitable pH test kit.

Ounces of AM-CHLOR needed $\frac{\text{Gals. pool water} \times 5}{5,000}$

The above formula should yield 1.0 ppm.

Maintenance Dosage: Repeat above dosage daily or as needed depending upon such factors as high temperature, presence of organic debris and bathing load.
