

RIGHT PANEL

N-TA-GERM Drycleaning Disinfectant, when used according to directions, will disinfect against Staphylococcus aureus and Salmonella choleraesuis and inhibit the growth of the following microorganisms in the presence of high relative humidities or when the treated fabric is contaminated by way of a liquid contaminant; such as perspiration:

Escherichia coli
Pseudomonas aeruginosa
Corynebacterium diphtheriae
Bacillus subtilis

Trichophyton mentagraophytes
Epidermophyton folccosum
Microsporum audouini
Haemophilus influenza

N-TA-GERM Drycleaning Disinfectant is a true deodorant which destroys obnoxious odors instead of masking them. Odors due to microbial decomposition are eliminated by the destruction of the microorganisms. Drycleaning solvents employing N-TA-GERM Drycleaning Disinfectant action will destroy urine, perspiration, vomit, and personal illness odors from garments, but will not contribute an odor of its own.

N-TA-GERM Drycleaning Disinfectant is an antimicrobial chemical agent designed to preserve the purity and integrity of both perchloroethylene and Stoddard solvent by destroying or inhibiting harmful microorganisms.

NOTE: To avoid decomposition, which will release smoke and flammable vapors, store in a cool, dry place below 140°F (60°C). DO NOT STORE NEAR FLAMMABLE MATERIALS. KEEP AWAY FROM ALL SOURCES OF FLAME OR HEAT INCLUDING STEAM RADIATORS.

WARNING HARMFUL IF SWALLOWED

Avoid contact with skin and eyes • Wash skin with plenty of water after handling • Do not wear clothing grossly contaminated with the product•

Rinse empty container thoroughly with water and discard it
