

PANEL A

STORAGE AND DISPOSAL

Prohibitions: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

Disposal: Do not reuse empty container. Wrap container and put in trash collection.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

The use of this product in indoor residential settings is limited to spot and/or crack and crevice treatments. This product should be applied as a coarse (large droplet) spray. Treat where pests are found or normally occur. For spot treatments, an individual spot should not exceed two square feet.

ROACHES: Remove all dishes, food and utensils from the area to be sprayed. Make spot applications to infested roach haunts - behind sinks, into cracks and crevices, the underside of all drawers, baseboards, pipeholes in walls and cracks of kitchen cupboards. Inspect and treat other areas in the house where infestation is evident. Pay particular attention to bathrooms, cracks and crevices in closets, dresser drawers and frames. Replace dishes, food and utensils only after shelves and cupboards have thoroughly dried.

ANTS, SPIDERS, SILVERFISH, CRICKETS, AND EARWIGS: Spray areas where these pests are found or may hide including dark corners of rooms and closets, cracks and crevices, along baseboards and door sills and frames, behind and beneath sinks, stoves, refrigerators and cabinets, and around garbage cans, plumbing and other utility installations. Pests driven out of hiding places should be sprayed directly. Spray ant trails, nests and points of entry. Repeat treatment as required.

FLEAS AND BROWN DOG TICKS INDOORS: Remove pets from rooms to be treated. Vacuum floors and furniture in rooms where infestation is evident. Discard contents of bag. Spot treat floors and baseboards in infested rooms where the pets eat, sleep, and rest. Spot treat under furniture. Do not apply to the cushions of furniture or bedding. Do not treat pets with this product. Rather, inspect and treat your pet with a product registered for animal applications. This will help control the source of the infestation. Replace pet bedding with fresh materials after treatment. Allow treated areas to dry completely before reoccupying the room.

FLEA AND BROWN DOG TICKS OUTDOORS: For treatment of localized infestation of these insects in outdoor areas where there are weeds or brushy non-crop areas, spray infested areas thoroughly. Repeat application as infestations warrant and as reinfestation occurs.

FLIES AND MOSQUITOES: For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures or porches, in garages, and other places where these insects alight or congregate. Repeat as necessary.

PANEL C

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

if swallowed: Avoid contact with eyes, skin, and clothing. Avoid breathing vapors or spray mist. Keep away from feed, foodstuffs and domestic water supplies. Do not use in edible products area of food processing plants, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Do not use on household pets or humans. Remove pets and cover fishbowls before spraying. Do not smoke while using. Wash thoroughly after handling. Keep children and pets away from treated areas until surfaces are dry.

FIRST AID

IF SWALLOWED: Call a physician or poison control center. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting to an unconscious person.

IF ON SKIN: In case of contact, remove contaminated clothing immediately. Wash skin with plenty of soap and water. Get medical attention.

IF IN EYES: Flush eyes with plenty of water for 15 minutes. Get medical attention.

IF INHALED: Remove victim to fresh air. Apply respiration if indicated. Get medical attention.

Note to Physician: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is an antidote.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams and ponds. Do not apply where runoff is likely to occur. Do not apply when weather favors drift from treated areas. Do not apply directly to water. Do not contaminate water by cleaning equipment or disposal of wastes. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS

Do not spray on wallpaper or let material run down painted walls. Do not spray on or near electrical outlets, switches, junction boxes, or other electrical equipment due to possibility of shock hazard.
