# POOL AID

## 1" CHLORINATING TABLETS

Slow Dissolving  
Stabilized Tablets

Active Ingredient: Trichloro-s-triazinetrione.....99.9%  
Inert Ingredients.....1.0%  
Available Chlorine.....90.0%

**KEEP OUT OF THE REACH OF CHILDREN**  
**DANGER**

SEE STATEMENT OF PRACTICAL TREATMENT AND OTHER  
PRECAUTIONS ON SIDE PANEL.

EPA REG. NO. 36284-1

EPA EST. NO. 36284-CA-1

PRO PACKAGING, INC.  
RIVERSIDE, CALIFORNIA 92507 NET WEIGHT: 4 LBS [1.81 KG]

### DIRECTIONS FOR USE

It is a violation of Federal law to use POOL AID 1" CHLORINATING TABLETS in a manner inconsistent with its labeling.

A single POOL AID 1" CHLORINATING TABLET will provide 1.0 ppm available chlorine by weight per 3,000 gallons of swimming pool water. Reentry into treated pools is prohibited above levels of 3.0 ppm available chlorine. Outdoor pools stabilized with POOL AID WATER CONDITIONER will require less chlorine. See directions on conditioner label.

POOL AID 1" CHLORINATING TABLETS are manufactured for use in erosion-type tablet feeders, wherein the water flows over the tablets slowly, providing a constant chlorine feed rate. Do not place tablets directly into the pool. Contact with concrete and vinyl may cause staining.

### CHLORINATION

**Establish an initial chlorine residual.** Establish an initial chlorine residual in the 1.0 - 3.0 ppm range with a fast-dissolving, granular product such as POOL AID GRANULAR CHLORINATING CONCENTRATE or a liquid chlorinating product. Follow directions of the labels of these products.

**Maintenance of the chlorine residual:** When an initial residual has been established, maintain the residual with 14 tablets per 8,000 gallons every 7 - 14 days in a chlorine tablet feeder. The number of tablets used every 7 - 14 days may vary with temperature, wind, pool usage, and feeding method. Test the chlorine residual in the pool water frequently with a reliable test kit. Adjust the tablet feed rate as necessary to maintain the chlorine residual in the 1.0 - 1.5 ppm range.

### pH

Measure pH of swimming pool water immediately prior to treatment with POOL AID 1" CHLORINATING TABLETS. Use a reliable test kit. If necessary adjust and maintain pH within 7.2 - 7.6 range. POOL AID DRY ACID lowers pH. POOL AID pH UP raises pH. Follow directions for use on these labels.

### STORAGE AND DISPOSAL

Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large quantities of water to dissolve all material before discarding. Do not reuse empty container. Securely wrap original container with several layers of newspaper and discard in trash.

### STATEMENT OF PRACTICAL TREATMENT

**IF SWALLOWED:** Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.  
**IF IN EYES:** Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.  
**IF ON SKIN:** Wash with plenty of soap and water. Get medical attention.  
**IF INHALED:** Victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.  
**Note to Physician:** Probably mucosal damage may contraindicate the use of gastric lavage.

### PRECAUTIONARY STATEMENTS

#### Hazards to Humans and Domestic Animals

**CORROSIVE.** Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing, and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating.

#### Environmental Hazards

This pesticide is toxic to fish and other aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to the discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your local State Water Board or the regional office of the EPA.

#### Physical and Chemical Hazards

**STRONG OXIDIZING AGENT.** Mix only with water. Use clean, dry utensils. Do not add POOL AID 1" CHLORINATING TABLETS to any dispensing device which contains remnants of any other products. Such use may lead to a violent chemical reaction leading to fire and/or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases, and/or possible fire and/or explosion. In case of decomposition, isolate container in open air or in a well-ventilated area. If necessary, flood with large quantities of water and flush to a sanitary sewer.

### pH

Measure pH of swimming pool water (immediately) prior to treatment with POOL AID 1" CHLORINATING TABLETS. Use a reliable test kit. If necessary adjust and maintain pH within 7.2 - 7.6 range. POOL AID DRY ACID lowers pH. POOL AID pH UP raises pH. Follow directions for use on these labels.

### STORAGE AND DISPOSAL

Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate drum, if possible, and flood with large quantities of water to dissolve all material before discarding. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal site. Completely empty plastic liner by shaking or tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of plastic liner in a sanitary landfill or by incineration if allowed by State and local authorities. If drum is not damaged, it may be reused. Do not contaminate water, food, by storage or disposal.
