ACCEPTED

NOV 10 2004

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide, registered under EPA Reg. No. 36284-1

ClearView™ 1" Chlorinating Tablets

water treatment

ACTIVE INGREDIENTS:

| | |
|----------------------------|------|
| TRICHLORO-S-TRIAZINETRIONE | 99% |
| INERT INGREDIENTS | 1% |
| TOTAL | 100% |
| AVAILABLE CHLORINE | 90% |

Slow Dissolving, Stabilized

KEEP OUT OF REACH OF CHILDREN

DANGER:

SEE STATEMENT OF PRACTICAL TREATMENT, FIRST AID, AND OTHER PRECAUTIONS ON SIDE PANEL

| FIRST AID | |
|---|--|
| If Swallowed | Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person. |
| If In Eyes | Hold eye open and rinse slowly and gently with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice. |
| If on Skin or Clothing | Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice. |
| If Inhaled | Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice. |
| Have the product container or label with you when calling poison control center or doctor, or going for treatment. | |
| Note to Physician : Probable mucosal damage may contraindicate the use of gastric lavage | |

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. A single CLEARVIEW 1" CHLORINATING TABLET will provide 1.0 ppm available chlorine by weight per 3,000 gallons of swimming pool water. Reentry into treated pools is prohibited above levels of 3.0 ppm available chlorine. Outdoor pools stabilized with CLEARVIEW WATER CONDITIONER will require less chlorine. See directions on container label. This product is manufactured for use in erosion-type tablet feeders, wherein the water flows over the tablets slowly, providing a constant chlorine feed rate. Do not place tablets directly into the pool. Contact with concrete and vinyl may cause staining.

CHLORINATION:

Establish an initial chlorine residual: Establish an initial chlorine residual in the 1.0 - 3.0 ppm range with a fast-dissolving, granular product such as CLEARVIEW GRANULAR CHLORINATING CONCENTRATE or a liquid chlorinating product. Follow directions of the labels of these products.

Maintenance of the chlorine residual: When an initial residual has been established, maintain the residual with 14 tablets per 8,000 gallons every 7 - 14 days in a chlorine tablet feeder. The number of tablets used every 7 - 14 days may vary with temperature, wind, pool usage, and feeding method. Test the chlorine residual in the pool water frequently with a reliable test kit. Adjust the tablet feed rate as necessary to maintain the chlorine residual in the 1.0 - 1.5 ppm range.

pH: Measure pH of swimming pool water immediately prior to treatment with CLEARVIEW 1" CHLORINATING TABLETS. Use a reliable test kit. If necessary, adjust and maintain pH within 7.2 - 7.6 range. pH DOWN lowers pH. pH UP raises pH. Follow directions for use on these labels.

STORAGE AND DISPOSAL:

Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large quantities of water to dissolve all material before discarding. Do not reuse empty container. Securely wrap original container with several layers of newspaper and discard in trash.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

DANGER - CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing, and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

Environmental Hazards: This pesticide is toxic to fish and other aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your local State Water Board or the regional office of the EPA.

Physical And Chemical Hazards: Strong Oxidizing Agent. Mix only with water. Use clean, dry utensils. Do not add CLEARVIEW 1" CHLORINATING TABLETS to any dispensing device which contains remnants of any other products. Such use may lead to a violent chemical reaction leading to fire and/or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases, and/or possible fire and/or explosion. In case of decomposition, isolate container in open air or in a well-ventilated area. If necessary, flood with large quantities of water and flush to a sanitary sewer.
