

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER:

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes or on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Rinse eyes with water and flush. Avoid breathing dust. Handle and store in accordance with safety rules.

ENVIRONMENTAL HAZARDS:

The product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless so authorized under an approved permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT:

Strong Oxidizing Agent. Mix only with water. Use with dry materials. Do not add this product to any swimming device containing material of any other product. Such mixtures may cause a violent reaction leading to fire or explosion. Contact with moisture, organic matter, or other chemicals may cause a chemical reaction with generation of heat. Storage in airtight containers. This product is not to be used in contact with any material of any kind. Do not use in contact with any material of any kind. Do not use in contact with any material of any kind.

STORAGE AND DISPOSAL:

Store product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container. Do not use if there is any leakage or if the container is damaged. Place in your container or other suitable container for disposal.

CONCENTRATED CHLORINATING CHEMICAL

Active ingredient: Sodium Dichloro-s-Dichloro-triazine 100% Available Chlorine 63%

KEEP OUT OF REACH OF CHILDREN DANGER

Practical Treatment: If you get it on your skin, wash it off with water. If you get it in your eyes, flush with water for at least 15 minutes. If you get it on your clothes, get it off as soon as you can. If you get it on your hair, wash it off with water. If you get it on your face, wash it off with water. If you get it on your hands, wash them with soap and water.

Net Weight 5 lbs.

Features a dry chlorine which dissolves immediately! A most effective germicide and algicide! Will not cause cloudiness in water! Will not add scale-forming minerals to the water! Will maintain crystal clearness of your pool!

DIRECTIONS FOR USE:

It is a measure of safety to use the product in a manner recommended as follows:

When starting up or fresh filling a pool, add approximately 1 lb. of POOLAID per 1000 gallons of water. Add POOLAID per 1000 gallons of water. The rate for maintenance of the pool is 1 lb. per 1000 gallons of water. Add POOLAID per 1000 gallons of water. The rate for maintenance of the pool is 1 lb. per 1000 gallons of water. Add POOLAID per 1000 gallons of water. The rate for maintenance of the pool is 1 lb. per 1000 gallons of water.

During hot weather and after heavy rain, check the pool. Follow the instructions on the product label. Do not permit children to play in the pool until the chlorine level is 2.0 ppm. If the chlorine level is 2.0 ppm, the pool is safe for swimming.

The content of this product is guaranteed. POOLAID is a dry chlorine which dissolves immediately. It is a most effective germicide and algicide. It will not cause cloudiness in water. It will not add scale-forming minerals to the water. It will maintain crystal clearness of your pool.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER:

Causes skin and eye damage. May be fatal if inhaled. Do not get in eyes, on skin or on clothing. Wash with water if on skin and wash clothes when soiled. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

Do not get in water. Do not discharge into water. Do not get in water. Do not get in water. Do not get in water.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT:

Very Oxidizing Agent. May react with water. May cause fire. Do not get in eyes, on skin or on clothing. Wash with water if on skin and wash clothes when soiled. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STORAGE AND DISPOSAL:

Keep product dry in original closed container when not in use. Do not get in eyes, on skin or on clothing. Wash with water if on skin and wash clothes when soiled. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

CONCENTRATED CHLORINATING CHEMICAL

Active ingredient: Sodium Dichloro-s-triazine triene 100% Available chlorine 52%

KEEP OUT OF REACH OF CHILDREN DANGER

PRACTICAL TREATMENT: FIRST AID: If swallowed, keep head tilted to side followed by vomit if a quantity of 100 or more is ingested. If on the skin, wash with water. If on the eyes, wash with water for at least 15 minutes. If inhaled, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

Net Weight 5 lbs.

Features a dry chlorine which dissolves immediately! A most effective germicide and algicide! Will not cause cloudiness in water! Will not add scale-forming minerals in the water! Will maintain crystal clearness of your pool!

DIRECTIONS FOR USE:

It is a matter of Pool-Aid to use the product in a manner consistent with its labeling.

When starting up or re-starting a pool, superchlorinate to safely shock chlorine bacteria and destroy a free chlorine residual between 1.0-1.5 ppm. Superchlorinate with 1 lb. of POOL-AID per 1000 gallons of pool water. The next day, reduce the pool's chlorine level. Follow directions for distribution on the label. Add POOL-AID gradually daily, or as needed, at the rate of 1/2 to 1 lb. per 1000 gallons of pool water. This is an optional dosage. Use a minimum of one ounce per 1000 gallons. Maintain chlorine residual between 1.0-1.5 ppm. Maintain pH between 7.2-7.6.

During hot weather and after heavy rain, shock your pool. Follow superchlorination instructions in preceding paragraph. Do not permit swimmers to enter until the chlorine residual is 2.0 ppm or less. Keep in mind that cloudy weather often obscures chlorine level. Be vigilant in the event of heavy rain, that concentrations of dust, dirt, and debris and their effect may require a frequent shock treatment.

The source of all is greatly simplified using POOL-AID chlorinating compound. In fact, you will require less 1/2 to 1/4 of the usual dosage. POOL-AID provides a more stable form of chlorine, allowing for better maintenance of an effective chlorine residual in pool water. It requires less storage space and remains stable in solution. It is economical to use. In the case of children, you will want to use POOL-AID immediately upon use.
