Subject: Pro Packaging, Inc.
ClearView Granular Chlorinating Concentrate 56
36284-11
EPA Reg. No.
Application Date: June 18, 2014
Receipt Date: June 27, 2014

Dear Ms. Radtke:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is accepted.

Label Amendment

- Revise Precautionary Statements
- Revise the Physical and Chemical Hazard Section
- Revise the Storage and Disposal Section
- Separate Pool and Spa Directions for Use

General Comments

Based on a review of the information submitted, the labeling amendment is acceptable. A stamped copy of the label is enclosed for your records. This labeling supersedes all previously accepted ones on file. The next label printing of this product must use this labeling unless subsequent changes have been approved. You must submit one (1) copy of the final printed labeling before you release this product for shipment bearing the new labeling. In accordance with 40 CFR § 152.130(c), you may distribute or sell this product under the previously approved labeling for up to 18 months from the date of this letter. After 18 months from the date of this letter you may only distribute or sell this product if it bears this new revised labeling of subsequently approved labeling.

Should you have any questions or comments concerning this letter, please contact Wanda Henson via email at Henson.Wand@epa.gov or call (703) 308-6345.

Sincerely,

A handwritten signature in cursive script, appearing to read "for Wanda Henson".

Antimicrobials Division (7510P)

Enclosure: Stamped Label

ACCEPTED
09/24/2014
Under the Federal Insecticide, Fungicide
and Rodenticide Act as amended, for the
pesticide registered under
EPA Reg. No. 36284-11

ClearView
Granular Chlorinating Concentrate 56

ACTIVE INGREDIENT:
Sodium Dichloro-s-triazinetriene Dihydrate99%
INERT INGREDIENTS.....1%
TOTAL.....100%
Available Chlorine.....55%

KEEP OUT OF REACH OF CHILDREN
DANGER

[See [back] [side] panel for additional precautionary statements.]
[See [first aid] [and] [other precautions] [precautionary statements] on [back] [side] panel]

FIRST AID

If In Eyes:	Hold eye open and flush with plenty of water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.
If Inhaled:	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice.
If on Skin or Clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. Call a poison control center or doctor immediately for treatment advice.
If Swallowed	Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.
Have the product container or label with you when calling poison control center or doctor, or going for treatment.	
Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

FOR SWIMMING POOL USE:

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is intended for use in controlling bacteria and algae in swimming pools.

This product should be added directly to the surface of circulating water according to the directions. Each ounce of this product will provide about 0.4 ppm (mg/L) of available chlorine to 10,000 gallons of water.

Reentry into treated swimming pools is prohibited above levels of 4 ppm of chlorine.

[Note to Reviewer: This section will only be used with 1 lb. bags]

How to Use: Add dosage of this product during evening hours while filter is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. Use entire contents when opened. If any granules settle to the bottom of the pool use brush to disperse.

Start Up: Before using this product, make sure that the filtration system is clean and operating properly. Adjust the pH of the water to a range of 7.2-7.6 using suitable products, and a reliable test kit. Adjust the alkalinity of the water to a minimum of 125 ppm (mg/L), based on the test kit reading. Add a sufficient amount of this product directly to the surface of circulating water to raise the free chlorine level in the water to 5-6 ppm (mg/L), based on the test kit reading. As a guide, for swimming pools addition of 10 ounces of this product for each 10,000 gallons of water will increase the free residual chlorine by 4 ppm (mg/L).

Shock Treatment: Super chlorination: In extremely hot weather, when many people use the pool, when water becomes hazy or after heavy rains, a shock dosage of chlorine may be obtained by spreading Clear View Granular Chlorinating Concentrate 56 over surface pool water. 14 ounces of Clear View Granular Chlorinating Concentrate 56 per 10,000 gallons of pool water provides approximately 6 ppm of chlorine. Note: Do not use pool until chlorine residual falls below 4 ppm.

Maintenance Treatment: Add this product daily or as needed to maintain the free chlorine residual in the water at 1-3 ppm (mg/L) as indicated by a reliable test kit. Each ounce of this product will provide about 0.4 ppm (mg/L) of available chlorine to 10,000 gallons of water. Weather and usage effect sanitizer levels. Maintain the pH at 7.2-7.6 and the alkalinity at a minimum of 125 ppm (mg/L). As a guide for swimming pools, addition of five ounces of this product for each 10,000 gallons of water will increase the free residual chlorine by 2 ppm (mg/L).

FOR SPA USE:

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is intended for use in controlling bacteria and algae in spas. This product must be added directly to the surface of circulating water according to the directions. It is recommended that spas and hot tubs be drained every 30 - 90 days, more often if under heavy use.

Reentry into treated spas is prohibited above levels of 5 parts per million (ppm) of chlorine.

Start Up: Before using this product, make sure that the filtration system is clean and operating properly. Adjust the pH of the water to a range of 7.2 - 7.6 using suitable products and a reliable test kit. Adjust the alkalinity of the water to 125 ppm based on a test kit reading. Add a sufficient amount of this product directly to the surface of circulating water to raise the free chlorine level in the water to 5-6 ppm (mg/L) based on a test kit reading. Addition of one ounce of this product for each 1,000 gallons of water will increase the free residual chlorine by 4 ppm (mg/L).

Maintenance: Add this product daily or as needed to maintain the free chlorine residual in the water at 1 - 3 ppm (mg/L) as indicated by a reliable test kit. Weather and usage effect sanitizer levels. Maintain the pH at 7.2 - 7.6 and the alkalinity at a range of 125 ppm. Addition of ½ ounce of this product for each 1,000 gallons of water will increase the free residual chlorine by 2 ppm (mg/L).

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals:

DANGER: CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Irritating to nose and throat. Open in a well-ventilated area. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear safety glasses, face shield or goggles and rubber gloves. Wash hands after handling and before eating, drinking and chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

{For containers of 50 lbs. or less}

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms.

{For containers of 50 lbs. or more}

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: DANGER: Strong Oxidizing Agent. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire or explosion. In case of contamination or decomposition, do not reseal container. If possible isolate each container in open air or well-ventilated area away from heat or open flame and burning material (like a lighted cigarette).

STORAGE & DISPOSAL:

{Nonrefillable container - household/residential use}

[Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. For disposal of a contaminated or decomposing product see emergency handling.]

{Nonrefillable container - non-household/residential use}

[Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Do not contaminate food or feed by storage or disposal or cleaning of equipment. For disposal of a contaminated or decomposing product see emergency handling. Nonrefillable container. Do not reuse this container. Offer for recycling if available. Rinse empty container thoroughly with water to dissolve all material prior to disposal.]

EMERGENCY HANDLING: In case of contamination or decomposition – Do not reseal container. Immediately remove container to an open and well ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.
