Keeps Pipes Root Free

Prevents Root Growth in Underground Soil Pipe

ACTIVE INGREDIENT Copper Sulphate (pentahydrate)98%
INERT INGREDIENT1%

*Rootline will not
harm plumbing
fixtures or pipes!*

Rootline's principal ingredient, used as directed, will not interfere with the bacterial digestion processes used to digest sewage sludge. • Since septic tanks utilize the same bacterial digestion process, Rootline is harmless for septic tanks also.

*Keep out of the
Reach of children
See other precautions
on back panel.*

Keeps Pipes Root Free

Rootine

NET WT. 5 POUNDS
(2.27 KG)

Flush 3½ oz. (about one level Rootine capfull) down toilet bowl once a month to ~~prevent~~ root growth in underground sewer lines. Apply at night or when sewer will not be used immediately afterwards. ~~Sitting~~ *Sitting* on your shelf, Rootine is useless! If sewer is stopped up, clean first with a machine, then treat every month with Rootine. If sewer is not stopped up ... wonderful! Use Rootine monthly to keep roots out. *Remember, for every root hair cut off by an electric rooter, two will grow in its place.*
