NOTICE OF PESTICIDE: REGISTRATION
 RENEWAL

Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended.

NAME OF PESTICIDE PRODUCT

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

REGISTRANT'S NAME AND ADDRESS
 REGISTRANT'S NAME AND ADDRESS

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

STATEMENTS

HAZARDS TO HUMANS:

Avoid inhalation and contact with eyes or
open wounds.

REUTEL
SOD WEBWORM ATTACK™

Sod Webworm Attack™ spray is a natural, effective control for sod webworms. Sod webworms feeding on treated grass quickly become sick, stop feeding and die.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product is specially formulated for use on lawns as a spray. Application is best with a tank or hose-end sprayer.

Sod webworms emerge in spring and begin feeding on grass blades just above the soil surface. Damage appears as small brown patches. Using a flashlight, they are easily found at night. In mid summer, adult moths lay eggs randomly in the lawn. This creates the most damaging second generation which appears in late summer.

For best results, apply Sod Webworm Attack™ in the evening when worms begin to feed. Thorough coverage of the grass blades is important to achieve effective control.

Sod Webworm Attack™ spray also controls most other worms and caterpillars in the lawn. This product appears to have no adverse effects on earthworms or on beneficial insects, such as ladybugs and praying mantids.

APPLICATION RATES:

This package will cover 5,000 sq. ft. of lawn area. Mix three (3) tablespoons per gallon of water. Do not store diluted spray for more than 12 hours.

<u>Tablespoons</u>	<u>Gallons of Water</u>	<u>Sq. Ft. of Coverage</u>
3	1	1,000
6	2	2,000
12	4	4,000
15	5	5,000

One application will effectively control the sod webworm population that is present at the time of application. Second or third generations may appear. This requires a separate application.

STORAGE AND DISPOSAL:

Storage: Reclose the container of unused product and store in a cool, dry area.

Disposal: Do not reuse empty package. Do not contaminate food or potable water by disposal. Discard according to local refuse regulations.

NOTICE: Reuter Laboratories makes no warranty, express or implied for any particular purpose concerning this material, other than those which are contained on this label.
