OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

April 16, 2015

Mr. Mark Mongiovi
Assistant Manager
Regulatory Affairs
Woodstream Corporation
69 Locust Street
Lititz, PA 17543-0327

Subject: Notification per PRN 98-10 – Minor Label Revisions
Product Name: BROMETHALIN MOUSE BAIT STATION II
EPA Registration Number: 36488-62
Application Date: April 9, 2015
Decision Number: D503403

Dear Mr. Mongiovi:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

If you have any questions, you may contact Dr. William W. Jacobs at 703-305-6406 or via email at jacobs.bill@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "William W. Jacobs" followed by the word "for" in a smaller font.

Venus Eagle, Product Manager 01
Invertebrate and Vertebrate Branch 3
Registration Division (7505P)
Office of Pesticide Programs

MASTER LABEL – OUTER CONTAINER FRONT PANEL (Page 1 of 1)

BROMETHALIN MOUSE BAIT STATION II

[Alternate Brand Names – Non- Refillable Products]

- Victor V® Fast-Kill® Brand Bait Station*

[Alternate Brand Names –Refillable Products]

- Victor V® Fast-Kill® Brand Refillable Bait Station*

[Qualifier Statement - Must immediately follow brand name]

* House Mice may consume a lethal dose in a single night's feeding, but it can take two or more days from the time of bait consumption for these mice to die.

NOTIFICATION

36488-62

The applicant has certified that no changes, other than those reported to the Agency have been made to the labeling. The Agency acknowledges this notification by letter dated:

04/16/2015

**This Bait Station is Resistant to Tampering by Children.

KEEP OUT OF REACH OF CHILDREN

CAUTION: (See [side panel] [back panel] for additional precautionary statements [and directions for use])

NET CONTENTS:

0.0469lb/0.75oz (1 X 0.75oz. (21.2g) bait blocks [*to*] 1lb/16oz (21 X 0.75oz. (21.2g) bait blocks & X [refillable] bait station[s])

Each bait station contains one 0.75oz (21.2g) bait block

MASTER LABEL – OUTER CONTAINER BACK PANEL (Page 1 of 6)

PRECAUTIONARY STATEMENTS:

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, or using tobacco. Any person who handles bait, refills a station, or retrieves carcasses or unused bait must wear gloves.

FIRST AID	
Have label with you when obtaining treatment advice.	
If swallowed:	<ul style="list-style-type: none">- Call a poison control center, doctor or 1-800-858-7378 immediately for treatment advice.- Have person sip a glass of water if able to swallow.- Do not induce vomiting unless told to do so by the poison control center or doctor.- Do not give anything by mouth to an unconscious person.
If on skin or clothing:	<ul style="list-style-type: none">- Take off contaminated clothing.- Rinse skin immediately with plenty of water for 15-20 minutes.- Call a poison control center or doctor for treatment advice.
TREATMENT FOR PET POISONING	
If animal eats bait, call veterinarian at once.	
NOTE TO PHYSICIAN OR VETERINARIAN	
Contains the nerve poison Bromethalin. This product is not an anticoagulant rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.	

ENVIRONMENTAL HAZARDS:

This product is toxic to fish, birds and other wildlife. Dogs and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait.

[Refillable Product Directions]

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Dispose of product container, bait station, and used, spoiled, or unconsumed bait as specified on this label.

MASTER LABEL – OUTER CONTAINER BACK PANEL (Page 2 of 6)

USE RESTRICTIONS:

This bait station may be used in indoor areas accessible to children, consistent with all use restrictions and other requirements indicated in this label. **DO NOT USE THIS PRODUCT OUTDOORS OR IN AREAS ACCESSIBLE TO PETS.** This product may only be used to control house mice inside homes and other residential buildings. Do not place bait station in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

SELECTION OF TREATMENT AREAS: Determine areas where house mice will most likely find and consume bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where house mice or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

1. Remove bait station from package.
2. While wearing gloves, place one block of bait in the bait station. See additional GRAPHICS AND TEXT.
3. Place bait station on the floor, with flat side down, in areas where signs of house mice have been seen in the types of buildings identified under **USE RESTRICTIONS**.

Use one bait station per typical placement. If more than one bait station is used, space the stations 8 to 12 feet apart in suitable locations (see **SELECTION OF TREATMENT AREAS**) in infested buildings. After several days, inspect placements and refill bait stations if contents have been consumed or are contaminated. If no feeding has occurred within three days, bait stations may be moved to other appropriate locations in the building where there is evidence of feeding.

[Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night's feeding will usually provide a lethal dose, maintain an uninterrupted supply of bait for at least one week to provide all house mice a chance to feed on the bait. Continue baiting until at least 4 days have passed without signs of new feeding by house mice.]

Follow-Up: Wearing gloves, collect and properly dispose of all dead animals and leftover bait. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment.

MASTER LABEL – OUTER CONTAINER BACK PANEL (Page 3 of 6)

[INSTRUCTIONS FOR OPENING, FILLING, REFILLING AND RECLOSING]

HOW TO OPEN:

1. Apply gloves.
2. Hold the bait station in one hand with your thumb on the back tab and middle finger on the front tab.
3. While squeezing the front and back tabs, lift the lock tab on the bottom center of the bait station and pull open.

HOW TO FILL THE BAIT STATION:

1. Take one block and slide it down the holder post as far as it will go.

HOW TO CLOSE:

1. Take both hands and apply pressure to the top and bottom of the station without making contact with the block.
2. Press the station lid and bottom until they meet and continue to press firmly until you hear a snap. This is when the station has been closed properly.
