Subject: Sterilizing Gas 6 EPA Registration 36736-6 Amendment Dated: June 16, 2008 EPA Received Date: June 17, 2008

Dear Joanne K. Cashin

The following amendment submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, is acceptable.

Proposed Amendment

Revised Label Adding Language for Ethylene Oxide

General Comments

A stamped copy of the accepted label is enclosed for your records. Submit (3) copies of your final printed label before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please contact Velma Noble at (703)308-6233.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGERI CAUSES EYE AND SKIN

BURNS, HARMFUL IF INHALED, MAY CAUSE NERVOUS SYSTEM DAMAGE

DANGERI CANCER HAZARD AND REPRODUCTIVE HAZARD.

EFFECTS OF OVEREXPOSURE: May be fatal if inhaled in high concentrations. May cause irritation of the respiratory tract; chest tightness, headache, nausea, vorniting, diarrhea, light-headed feeling, dizziness, weakness, drowsiness, cyanosis, loss of coordination, convulsions, coma, delayed lung injury (fuid in the lungs), immediate or delayed skin irritation or blisters, allergic skin reaction. OTHER POSSIBLE DELAYED HEALTH EFFECTS:

May cause hervous system injury, cataracts, adverse reproductive effects, chromosomal and mutagenic changes, and cancer.

PEL ·

1 PPM TWA (as per the Ethylene Oxide Standard 29 CFR 1910.1047),

EL: 5 PPM - excursion limit 15 minutes. ODOR: Ether-like at high concentrations, Exposure to toxic levels may occur without warning to or detection by the user

PRECAUTIONS- Do not breathe vapor. Do not swallow. Do not get in eyes, on skin, or on clothing. Store and use with adequate ventilation in accordance with the Ethylene Oxide Standard (29 CFR 1910.1D47).

PERSONAL PROTECTION EQUIPMENT (PPE): A material that is chemical-resistant to this product is butyl rubber.

All handlers must wear at a minimum:

Long-sleeved shirt and long plants. Shoes plus socks,

Chemical-resistant gloves, and The employer shall provide a respirator that is adequate to protect the health of the employee and ensure compliance with all other OSHA statutory and regulatory requirements (see 29 CFR 1910.1047 and 29 CFR 1910.134).

When handlers could have eye or skin contact with ETO or ETO solutions, such as during maintenance and repair, vessel cleaning, or

- Solutions, Soch as during maintenance and hepain, vessel cleaning, or cleaning up splits, they must wear;
 Cohemical-resistant attire, such as an apron, protective suit, or footwear that protects the area of the body that might contact ETO or ETO solutions, and
 - face-sealing goggles, a full face shield, or a full-face respirator.

When wearing respirators:

- 1. Follow the respirator manufacturer's user's instructions for changing canisters.
- Respirators must be fit-tested and fit-checked using a program that conforms to OSHA's requirements (see 29CFR Part 2. 1910.134).
- З.
- 1910.134). Respirator users must be trained using a program that conforms to OSHA's requirements (see 29CFR Part 1910.134). Respirator users must be examined by a qualified medical practitioner to ensure physical ability to safely wear the style of respirator to be worn. A qualified medical practitioner is a physician or other licensed health care professional (PLHCP) who will evaluate the ability of a worker to wear a respirator. The initial evaluation procession of a cuerkiement in the other departmention. evaluation consists of a questionnaire that asks about medical conditions (such as a heart condition) that would be problematic for respirator use. If concerns are identified, then additional evaluations, such as a physical exam, might be necessary. The initial evaluation must be done before respirator use begins. It does not need to be repeated unless the health status of respirator use conditions change. (see 29CFR Part 1910, 134):

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Users should remove clothing/PPE immediately if pesticide gets inside

Then wash thoroughly and put on clean clothing

Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

PHYSICAL OR CHEMICAL HAZARDS:

DANGERI - NONFLAMMABLE LIQUID AND GAS UNDER PRESSURE. DANGERI – NONFLAMMABLE LIQUID AND GAS UNDER PRESSURE. Contents under pressure, Do not use near flame, sparks, hot surfaces, or allow sources of ignition near the sterilizationfumigation area. Ground all equipment (including this container) to prevent sparks. LEAK - In case of leak evacuate area and keep personnel upwind. Shut off all sources of ignition. Use self-contained breathing apparatus and protective clothing, and shut off leak if without risk. FIRE - In case of fire move container away from fire if without risk. Use under serve or find perster backage portbained contained breathing apparatus and protective clothing.

water spray or fog nozzle to keep container cool.

ENVIRONMENTAL HAZARDS:

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sever systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

It is imperative that users of this material be familiar with ARC Specialty Products' Material Safety Data Sheet for Sterilizing Gas 6, the label and valve tag attached to this cylinder.

DANGER PELIGRO PRECAUTION AL USARIO: Si usted no lee Ingles, no use este producto hasta que la etiqueta le hava sido explicada ampliamente

Users must follow requirements of the OSHA Occupational Exposure Standard for ethylene oxide (29 CFR 1910,1047).

FIRST AID

IN ALL CASES OF OVEREXPOSURE GET MEDICAL ATTENTION IMMEDIATELY. TAKE PERSON TO A DOCTOR OR EMERGENCY TREATMENT FACILITY AT ONCE.

IF INHALED - Move person to fresh air. Keep warm. If person is not breathing, call 911or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. If breathing is difficult, give oxygen. Call a poison control center or doctor for further treatment advice, even if there are no symptoms. Keep under medical observation - symptoms may be delayed. IF ON SKIN OR CLOTHING- Take off contaminated clothing and shoes. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Aerate, wash or clean control center or doctor for treatment advice. Aerate, wash or clean contaminated clothing and discard leather goods. IF SWALLOWED - Call poison control center or doctor immediately for treatment advice. Have person sip two glasses of water if able to swallow. Do not induce vomiting. Do not give anything by mouth to an unconscious person.

Inconscious person. IF IN EYES - Hold eye open and rinse slowly and gently with water for 15-20 minutes. Call a poison control center or doctor for treatment advice

HOTLINE NUMBER – Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.

Information. NOTE TO PHYSICIAN - Sin exposure to Sterilizing Gas 6 will commonly result in skin irritation with extensive blister formation. At high concentrations, severe conjunctivitis can occur. Irritation of the respiratory tract may occur, but without acute lung edema. Symptoms of systemic intoxication are headache, nausea, vomiting, incoordination, and cardiac irregularities. Treatment is symptomatic.

Refer to ARC Specialty Products' Sterilizing Gas 6 MSDS. If unable to locate MSDS for this product, please call ARC Specialty Products at the telephone number below and request that one be sent immediately.

. 88° -

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Employers in facilities that use ETO must comply with all of the requirements for ETO use specified in 29 CFR 1910.1047. This product may be used only in facilities that meet the requirements of the Ethylene Oxide Standard (29 CFR 1910.1047). This product may be used only in non-portable (commercial) vacuum or gastopic charge based only in hor-pollable (continuencial) vacuum of gas-topic charge or the second second second second second second second dioxide. This product may be used only by persons who have been trained in accordance with the Ethylene Oxide Standard (29 CFR 1910.1047). When used to starilize health care items, this product must be used in non-portable (commercial) ethylene oxide gas sterilizers that have FDA clearance.

In contract sterilization facilities, including facilities treating medical equipment and supplies, musical instruments, library/museum artifacts. cosmetics, and spices the following requirements must be followed:

Sterilization/fumigation with ETO must be performed only in vacuum or gas tight chambers designed for use with ETO.

Safety and awareness training is required for all employees including office staff. Information and training must be provided to all employees in the facility at the time of initial assignment and annually thereafter. The safety training must include, at a minimum, the following information:

- 1. The most recent monitored ambient levels of ETO in the facility;
- 2 The potential health effects from the levels of ETO in the facility.
- 3 The emergency response plan and how to respond in an emergency; The availability of the Material Safety Data Sheet and other materials 4
 - related to the health hazards of exposure to ETO.

In order to reduce ambient levels of ethylene oxide, lengthy facility aeration is encouraged. It can reduce potential long-term risks to employees not directly involved in the ethylene oxide applications.

Air monitoring should included the entire facility including office space, break areas, and loading/unloading areas.

AS A STERILANT AND FUMIGANT GAS:

1. AS A STERILANT AND FORMEANT GAS: A. For complete use directions (including type of surfaces, objects, or items/products recommended for treatment, pre-cleaning instructions, concentration of gas per unit volume of closed space to be treated, exposure time/temperature, relative humidity, ventilation/aeration time, and method of monitoring to be used) refer to the ethylene oxide gas sterilizer manufacturers' Operators Manuals.

This product may be used only to sterilize medical or laboratory items, pharmaceuticals, and asoptic packaging. (see 21 CFR 201.1(d)(5)) or to reduce microbial load on cosmetics. whole and ground spices or other seasoning materials (see 40 CFR 180.151), and artifacts, archival material tilizence binate or library objects.

In case of accident or emergency, call CHEMTREC at 1-800-424-9300 Net Contents: lbs

This product may not be used on or in any form of basil.

After August 1, 2008, this product may only be applied to or on spices, dried vegetables or seasonings utilizing an ETO sterilization method that uses a single sterilization chamber to pre-condition and aerate with an alternating vacuum and aeration purging procedure. If you wish to employ an alternative method to that described below, you must contact the Environmental Protection Agency Office of Pesticide Programs for instruction on how to receive authorization.

Place spices in the treatment chamber. Assure that the mixture of ethylene oxide and air is compatible with the chamber design, then, introduce into the chamber a concentration of Ethylene Oxide not to exceed 500 mg/L, with a dwell time not to exceed 6 hours. Then evacuate the gas from the chamber using a sequence of not less than 21 steam washes (injections and evacuations) between 1.5 PSIA (27" Hg) and 5.0 PSIA (20"Hg) while maintaining a minimum chamber temperature of 115° F.

B. Sterilization/fumigation with Sterilizing Gas 6 must be performed only in vacuum or gas tight chambers designed for use with Sterilizing Gas 6. C. Sterilizing Gas 6 cycle parameters depend on several sterilizing/fumigating variable factors: pre-conditioning (if any): exposure time; chamber air pressure: gas concentration: types and quantities of items to be sterilized/fumigated; packaging; load configuration in the chamber; microbial challenge method: desired degree of disinfection; and the desired performance of the sterilized/fumigated product and package. D. The sterilized/fumigated/fumigated product and package. D. The sterilized/fumigated cycle parameters should be those prescribed by the equipment manufacturer. If other cycle parameters are used, the safety and efficacy of the atternate cycle parameters must be validated and are the responsibility of the user. NEVER USE PARAMETERS WHICH ALLOW FLAMMABLE MIXTURES OF STERILIZING GAS 6 AND AIR TO ENTER THE CHAMBER.

2. INSTALLATION AND OPERATION OF THE CONTAINER - Follow the directions on the valve tag attached to this container.

STORAGE AND DISPOSAL

Do not contaminate food, feed, or water by storage and disposal. PESTICIDE STORAGE

Use in accordance with tag attached to valve. Store in cool, well-ventilated area. Avoid exposure to heat or direct sunlight as may cause polymerization.

PESTICIDE DISPOSAL

Pesticide Wastes are acutely hazardous. Improper disposal of excess pesticide, spray, or mixture of rinsate is a violation of federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Wasted representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL

When empty, return to supplier only. Before returning container to supplier:

- 1. Pressurized container with nitrogen to 50 psig total pressure at 70° F. 2. Replace valve plug tightly in valve outlet.
- 3. Check container valve and plug for leaks prior to shipment.

USE THIS PRODUCT WITHIN 120 DAYS OF ITS PURCHASE.

801467 (Rev. 06/08 - supersedes 10/06)
