FUNGICIDE AND ROENTICIDE ACT FOR ECONOMIC POISON REGISTERED UNDER NO.

SODIUM HYPOCHLORITE SOLUTION

"FOR SWIMMING POOL CHLORINATION AND SANITIZING."

ACTIVE INGREDIENT: SODIUM HYPOCHLORITE 9.2%
INERT INGREDIENTS 90.8%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give emetic or other acids. Do NOT induce vomiting. Get prompt medical attention.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

DANGER: Corrosive, may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the Regional Office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water and dilute before use. Mixing this product with gross fertilizers, urea, ammonium acids, detergents or other chemicals may release hazardous gases irritating to eyes, nose and throat.

NET CONTENT: 2.5 GALLONS

DIRECTIONS FOR USE GENERAL CLASSIFICATION

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

DIRECTIONS FOR SWIMMING POOL CHLORINATION

1. For a pool of 15,000 gallons, use 1.5 pints (15 fluid ounces) of this sodium hypochlorite solution for each 2500 gallons of water. This dosage is equivalent to 1 ppm available chlorine by weight.
2. Add 2 pints of water per 16 oz. of range and maintain at 1.5 ppm available chlorine residual at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. One half pint (8 fluid ounces) of this sodium hypochlorite solution for each 6000 gallons of water will provide 1 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 ppm available chlorine will depend upon temperature and number of swimmers. For the proper range, the pH and chlorine residual are in the proper range.

DIRECTIONS FOR DISINFECTION OF POTABLE WATER FOR HOME WELL WATER SYSTEMS

1. Use the sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to 9 parts of water. Mix sodium hypochlorite solution and water thoroughly and begin feeding immediately with a hypochlorinator (metering pump). Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system as determined by a DPD chlorine test kit. Bacteriological sampling should be conducted at regular intervals less than that prescribed by the local health department for the water supply. Regularly test the water for quality with a chlorine test kit.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

1. Use equipment in the normal manner. Just before using, rinse all surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with the sanitant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Add 1.7 fluid ounces (2.75 tsp.) of this sodium hypochlorite solution per 4 gallons of water will provide approximately 200 ppm available chlorine by weight.

NOTE: This product degrades with age. Use a chlorine test kit to measure dosage in the reservoir to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product or rinsate that cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not contaminate waterways by the cleaning of equipment.
