DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FOR CLEANING:

Lightly soiled areas-surfaces to be cleaned should be mopped or brushed with a solution containing 1 ounce per gallon of water. Rinse cleaned area with water.

Heavily soiled areas-mop or brush soiled surface with a solution containing 2-3 ounces per gallon of water. Rinsed cleaned area with fresh water.

GENERAL PURPOSE DISINFECTION:

Disinfect walls, floors and other hard inanimate surfaces in homes, schools, restaurants, restrooms and other public areas, and brush surfaces to be treated with a solution containing 1 ounce per gallon of water. Surfaces that are heavily soiled should be cleaned with 2 ounces per gallon of water and then disinfected. Allow to remain wet for 10 minutes, then remove excess liquid. Disinfect locker rooms, shower stalls, walkways around pools and other areas against pathogenic fungi, mop area with a solution containing 2 ounces in 3 gallons of water. This solution will destroy Trichophyton interdigitale, a causative agent of athlete's foot.

HOSPITAL DISINFECTION:

Disinfect floors, walls, furniture and other hard inanimate surfaces in hospitals and nursing homes, mop with a solution containing 2 ounces per gallon of water. Those surfaces that are heavily contaminated with blood, fecal material or exudates should be thoroughly scrubbed with a solution containing 2 ounces per gallon of water, and then rinsed with a solution containing 2 ounces per gallon of water before disinfection. Disinfecting solution should be allowed to remain wet for 10 minutes prior to removal of excess water.

SANITIZATION:

Sanitize walls, floors and equipment in food processing plants, first clean thoroughly with a solution containing 1 ounce per gallon of water. If surface is heavily soiled, use at the rate of 2-3 ounces per gallon to assure thorough cleaning. Sanitize cleaned surfaces with a
