**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS**

DANGER: Corrosive, may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

IN A MANNER INCONSISTENT WITH ITS LABELING**

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1) pound of sodium hypochlorite solution for each 3000 gallons of water. The desired residual is 5 ppm available chlorine by weight.

For Pool Maintenance:
A. Adjust pool water pH to 7.2 range and maintain.
B. Add 1 pound of sodium hypochlorite solution for each 10,000 gallons of water to maintain available chlorine residual of 1.0 to 1.5 ppm. One fourth (1/4) ounce of this sodium hypochlorite solution for each 400 gallons of water will give 1.0 ppm available chlorine by weight. Frequency of application and number of applications will depend on pool size, age and number of swimmers.
C. Use a test kit to maintain the pH and chlorine levels in the pool.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**

Use the sodium hypochlorite solution in the ratio of one part per one (1) part of water to 17 parts of water. Mix sodium hypochlorite solution and water thoroughly and begin feeding of solution with a hypochlorite metering pump. Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system, as determined by a DPD chlorine test kit. Bacteriological sampling must be conducted at a frequency no less than that prescribed by the National Interim Primary Drinking Water Regulations. Check water frequently with a DPD chlorine test kit.
*Contact your local Health Department for further details.

**DIRECTIONS FOR SANITIZING FOOD PROCESSING
OR DAIRY EQUIPMENT**

Clean equipment in the normal manner. Just before using, treat all surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Add one ounce of this sodium hypochlorite solution per 100 gallons of water. Rinse with water to approximately 100 ppm available chlorine by weight.
NOTE: This product degrades with age. Use a chlorine test kit and a measured quantity of water to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product or rinseate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
