

This Algaecide is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and, being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of algaecide tends to stabilize the total chemical treatment system.

This Algaecide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form, this chemical should not come in contact with high concentrations of chlorine. DO NOT MIX ALGAECIDE AND CHLORINE TOGETHER when adding to the pool. These chemicals should be handled separately. This Algaecide is economical, efficient and stable.

DIRECTIONS

For an initial application to a pool free of visible algae or when pool water is changed, use one ounce per 25,000 gallons of water.

For maintenance, use one ounce per 5,000 gallons of water every 5 to 7 days depending on the weather and use factors. After each rain of consequence, add one ounce per 5,000 gallons of water in addition to the above amounts.

If pool has visible algae growth treat with the initial dose. Vacuum or clean pool after 24 hours to remove algae debris. If visible algae are still present or reappear repeat this treatment procedure. When pool is free of visible algae use the recommended maintenance dose. The appropriate amount of this algaecide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation will assure rapid dispersion.

Aqua-Kleer 40

ACTIVE INGREDIENT:

Alkyl (C14, 58%; C16, 28%; C12, 14%)	
dimethyl benzyl ammonium chloride	40.00%
Inert Ingredients:	60.00%
Total Ingredients:	100.00%

DANGER: KEEP OUT OF REACH OF CHILDREN
 (SEE FIRST AID STATEMENT & OTHER PRECAUTIONS ON RIGHT PANEL).

Net Contents: 1 Quart

DANGER: KEEP OUT OF REACH OF CHILDREN. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, gelatin solution or egg white. If these are not available, drink a large quantity of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

This product is toxic to fish. Treated effluents should not be discharged where it will drain into lakes, streams, ponds or public water. Apply this product only as specified on the label.

TO DETERMINE POOL CAPACITY

Rectangular Pools — Length times width times average depth (in feet) times 7.5 equals gallons.

Round and Oval Pools — Long diameter times short diameter times average depth (in feet) times 5.9 equals gallons.

This Algacide is formulated to complement swimming pool water being treated with normal chlorine systems.

DIRECTIONS
 For all kinds of swimming pools, use 1/2 ounce of this algicide per 10,000 gallons of water. For outdoor pools, use 1/2 ounce per 10,000 gallons of water. For indoor pools, use 1/4 ounce per 10,000 gallons of water. Add to the water in several places in the pool. Recirculation will ensure rapid dispersion.

ACTIVE INGREDIENTS:
 ANI (C14, 50% / C14, 50% / C14, 14%) 40.00%
 Diethyl benzyl ammonium chloride 68.00%
 Inert Ingredients 100.00%
