

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
 AVOID CONTACT WITH SKIN AND CLOTHING. AVOID BREATHING VAPORS OR MIST. AVOID GETTING IN EYES.
FIRST AID: If in contact with eyes, flush with plenty of water. If in contact with skin, wash with plenty of water. If in contact with clothing, remove clothing immediately. Call a physician immediately.
ENVIRONMENTAL HAZARDS: Do not release into the environment. Do not contaminate water, food, or feed. Do not contaminate soil. Do not contaminate ground water. Do not contaminate surface water. Do not contaminate public water. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE & DISPOSAL: Keep containers closed and in original container. Do not contaminate water, food or feed. Do not contaminate soil, cleaners, and equipment.

For product containers, clean out when empty. Do not reuse containers and do not reuse containers for other purposes. Containers should be disposed of in an approved landfill or buried in a safe place.

For other containers, triple rinse (or equivalent) and recycle, reuse, or dispose of in an approved landfill or buried in a safe place. For other containers, triple rinse (or equivalent) and dispose of in an approved landfill or buried in a safe place away from water supplies. Open dumping is prohibited.

PT-120

A BROAD SPECTRUM
 SWIMMING POOL ALGAE KILLER

ACTIVE INGREDIENT

Polyoxyethylene ether triamine salt of
 2,2-dimethyl-4,4-dihydroxybutane-1,3-dithione

INERT INGREDIENT

TOTAL

The product contains 11.5% active ingredient
 and 88.5% inert ingredients.

CAUTION: KEEP OUT OF REACH OF CHILDREN

HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN AND CLOTHING.

See additional precautions and first aid instructions on the side panel.

DIRECTIONS FOR USE
GENERAL CLASSIFICATION

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

PT 120 is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using PT 120.

For pools having just visible algae growth add an initial dose of 97 to 150 fluid ounces of PT 120 per 10,000 gallons of water and remove surface algae debris by cleaning.

For treatment of a freshly cleaned and filled pool add initially 60 to 97 fluid ounces of PT 120 per 10,000 gallons of water.

To maintain pools free of visible algae growth, subsequent additions of 24 to 48 fluid ounces of PT 120 per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment.

PT 120 is compatible with those chemicals normally used to treat pools and effective at both acid and alkaline pH. PT 120 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix PT 120 with concentrated dry or liquid chlorine products.

PRELIMINARY STATEMENTS
 HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS
 This material is extremely toxic to humans and domestic animals. It is a strong irritant and may cause severe burns, blindness, and death if inhaled, ingested, or absorbed through the skin. It is also highly toxic to aquatic life and may cause severe environmental damage. Use of this material should be restricted to agricultural uses and should be carried out in accordance with the following instructions:
 1. This material should not be used in residential areas, public places, or near bodies of water.
 2. This material should be used only by trained personnel who have received specific instruction in its safe use.
 3. This material should be applied in accordance with the instructions on the label and should not be applied at the rate specified on the label.
 4. This material should be stored in a secure place, away from children and animals, and should be kept in its original container.
 5. This material should be disposed of in accordance with the instructions on the label and should not be dumped or otherwise disposed of in a way that may cause environmental damage.
 6. This material should be used only in accordance with the instructions on the label and should not be used in a way that may cause environmental damage.
 7. This material should be used only in accordance with the instructions on the label and should not be used in a way that may cause environmental damage.
 8. This material should be used only in accordance with the instructions on the label and should not be used in a way that may cause environmental damage.
