SECTION B

[Distributed only]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product  
in a manner inconsistent with the label.

**For control of mosquito larvae including Culex, Anopheles and Aedes species in intermittently flooded sites associated with tailwater on irrigated pastures or low areas within the pasture that hold water up to fourteen days.**

**FOR GRANULAR APPLICATION EQUIPMENT**

When abatement district equipment requires granules for application a 0.25 percent or 0.5 percent active ingredient granule may be made by following these use and mixing directions:

|  | <u>0.25% Granule</u> | <u>0.5% Granule</u> |
|--|----------------------|---------------------|
| Dimilin 25W                                      | 30 lbs.              | 60 lbs.             |
| Coarse sand (20/30 mesh)                         | 2957 lbs.            | 2927 lbs.           |
| Larvicidal oil (eg. Golden Bear<br>1313 or 1356) | 10 lbs.              | 10 lbs.             |
| Hysil 233  | 3 lbs.               | 3 lbs.              |
| Total  | 3000 lbs             | 3000 lbs.           |
| Rate of Use                                      | 10-16 lbs/A          | 5-8 lbs/A           |

Thoroughly mix sand and oil for 15 minutes, add Dimilin and Hysil and mix an additional 30 minutes. A typical batch should take 30 minutes to mix and 30 minutes to empty. Use granules promptly after mixing.

Application may be made by either ground or aerial application equipment. It is essential that application be uniform over the treated area. Repeat application in 7 to 9 days or as inspection indicates an increase in density of larvae.

A maximum number of six (6) applications will be made per year. Allow at least one day after each treatment before livestock enters treated area.

Do not make hay, or feed hay to livestock, from treated pastures.

Restricted to counties in Central California areas where irrigated pastures are found. For use by California Mosquito Abatement Districts. Authorization for application is limited to Mosquito Abatement personnel. Growers must be informed that the grass is not to be cut for hay.

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This labeling must be in the possession of the user at the time of pesticide application.
