DIRECTIONS FOR USE
GENERAL CLASSIFICATION

In accordance with Federal Law, to use this product in a manner inconsistent with its labeling.

RIPENING ROOMS - BANANAS and TOMATOES

Use in the first 24 hours of ripening process, at temperatures between 58°F to 70°F.

One (1) quart used as directed in 4,000 to 8,000 cubic foot ripening room produces ethylene concentration lasting from 20 to 1200 P.P.M. over a period of 12 hours.

One (1) pint used as directed in 1,000 to 4,000 cubic foot ripening room produces ethylene concentration lasting from 20 to 600 P.P.M. over a period of 12 hours.

TOBACCO (FLUE CURED)

Use immediately after flue curing.

One (2) quarts used as directed in 10,000 to 20,000 cubic foot ripening room produces ethylene concentration lasting from 20 to 300 P.P.M. over a period of 12 hours.

USE PRECAUTIONS

Anyone using this gas generator in any other type of room size should consult us prior to use.

Do not use on tobacco treated prior to harvest with ripening agents.

The ripening room or curing barn should be well stopped up tight, all vents and doors closed, cracks or holes in walls and doors should be repaired or covered over.

WARRANTY

Bayco makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

IMPORTANT NOTICE

Use of any other product other than ETHYLENE GAS GENERATOR CONCENTRATE in the ETHYLENE GAS GENERATOR is prohibited.
