

J & B POOL SUPPLY SWIMMING POOL CHLORINATOR

ACTIVE INGREDIENTS:

SODIUM HYPOCHLORITE.....9.2%
INERT INGREDIENTS.....90.8%

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention if swallowed. Drink large quantities of milk or gelatin solution or if these are not available drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

DANGER: Corrosive. May cause skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without valid discharge permit. For guidance contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc. or with ammonia acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SWIMMING POOL CHLORINATION:
For new pools or for Spring start-up, superchlorinate with one pint (16 fl. oz.) sodium hypochlorite solution for each 2500 gallons water. This dosage is equivalent to 5 ppm available chlorine.
For routine chlorination, adjust pH to the range 7.2-7.6 and add sodium hypochlorite solution, manually or by feeder device, at a rate to maintain a residual chlorine level of 0.6-1.0 ppm. One half pint (8 fl. oz.) in 6000 gallons water will raise the chlorine residual by 1 ppm. Frequency of addition will depend on temperature and bathing load. Use a reliable test kit to make certain that pH and chlorine residual are in proper ranges.
Note: This product degrades. Use a chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL

Prohibitions: Do not contaminate water, food or feed by storage or disposal. Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water.

Pesticide Disposal: Product or rinsate that cannot be used should be diluted with water and disposed in a sanitary sewer. Disposal must be in accordance to Federal or approved state procedures under Subtitle C of the Resource Conservation and Recovery Act.

Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved state and local procedures.

General: Consult Federal, State or Local disposal authorities for approved alternative procedures.
